## ACKNOWLEDGEMENT

The work presented in this thesis would not have been done without the invaluable support from many people. First and foremost, I wish to express my gratitude to my advisor, Asst. Prof. Dr. Nakorn Tippayawong, for introducing me to the field of Aerosol Science and providing precious suggestions and invaluable assistances throughout the stages of this work.

I would also like to thank Prof. Dr. Tanongkiat Kiatsiriroat, Assoc. Prof. Thawan Sucharitakul, Asst. Prof. Dr. Khajornsak Sopajaree and Prof. Dr. Wiwut Tanthapanichakoon for their valuable suggestions and who kindly served as the thesis examining committee members.

I thank all the people who helped me in tangible ways to finish the research, including Mr. Jirapus Titiyotin for his invaluable assistance in the detail design of the EMS. Special thanks I owe to Mr. Chanchai Dechthummarong at the Department of Electrical Engineering, Rajamangala Lanna University of Technology, Chiang Mai Campus for his valuable suggestions in the high voltage engineering.

I would like to gratefully acknowledge the National Electronic and Computer Technology Center (NECTEC), National Science and Technology Development Agency, Thailand for the financial support.

Last and most importantly, I thank my family for their support that sustained me throughout my study at Chiang Mai University and their encouragement.

Panich Intra
