

Appendix A

Electrical properties of Standard Solution

Standard solutions were used for the apparatus calibration. The standard solutions including three electrolytic solutions NaCl, KCl and MgCl₂ that commonly found in municipal landfill. Various concentrations of those solutions were used in the calibration. The more variation, the better calibration.

All electrical resistivity of the solutions used in the calibration must be known. The conductivity will be measured by the conductivity meter in mS.cm⁻¹ then converted it into ohm-m as a resistivity value.

1. Standard solutions used in four electrode model resistivity box calibration.

Standard Solution	Concentration (Mole)	The conductivity measurement			Resistivity (ohm-m)
		1 st measurement (mS.cm ⁻¹)	2 nd measurement (mS.cm ⁻¹)	Average measurement (Siemens.m ⁻¹)

Appendix B

Field Data and information

1. Hand Auger drillings Location

The drilling operations were done totally two days in 15th and 18th November 2005, just right after the rainy season in Chiang Mai. I did twenty hand auger drilling, the soil in the area is quite compact and contain with a lot of gravel.

I lost the data of some drillings due to reach the water level, get stuck by the thick layer of gravelly clay or thick layer of loose sand.

ID	Easting	Northing	Elevation (m)	Total drilling Depth (cm)
ST.18/1	493613	207298	331.3	80
ST.18/2	493657	207300	329.6	200
ST.18/3	493063	2072921	331.9	200
ST.18/4	493549	2073115	329.8	150
ST.18/5	493932	2072992	321.4	120
ST.18/6	493836	2072924	317.7	110
ST.18/7	493662	2072723	317.9	190
ST.18/8	493600	2072745	324.6	80
SMH-6	493655	2072996	327.6	165
SMH-20	493530	2072949	327.6	120
SMH-23	493355	2073337	336.0	90
SMH-2	493636	2072695	324.4	150
SMH-1	493490	2072750	325.7	60

2. Opened trench location

After did all the analysis, four type of sediment were picked up as the representative of the area. Four trenches were opened according to those data, to get the big amount of sediment samples for electrical resistivity laboratory measurement on 12th December 2005

ID	Easting	Northing	Elevation (m)	Depth of sample taken (cm)
SMH-6	493655	2072996	325.6	30-88
ST.18/8	493600	2072745	324.2	50-100
ST.18/7	493622	2072750	317.9	85-130
ST.18/6	493836	2072924	317.7	80-130

3. Groundwater Sampling Location

Groundwater Sampling was done in three monitoring wells. The monitoring wells were drilled by Aztec engineering company and were used in many investigations during The WADIS project still running until.

Observation well no.	Easting	Northing	Elevation (m)
MW-MH8 (upgradient)	493266	2072942	329.6
MW-MH3 uw (downgradient)	493528	2072804	325.2
MW-MH L2 (leachate)	493384	2073015	329.3

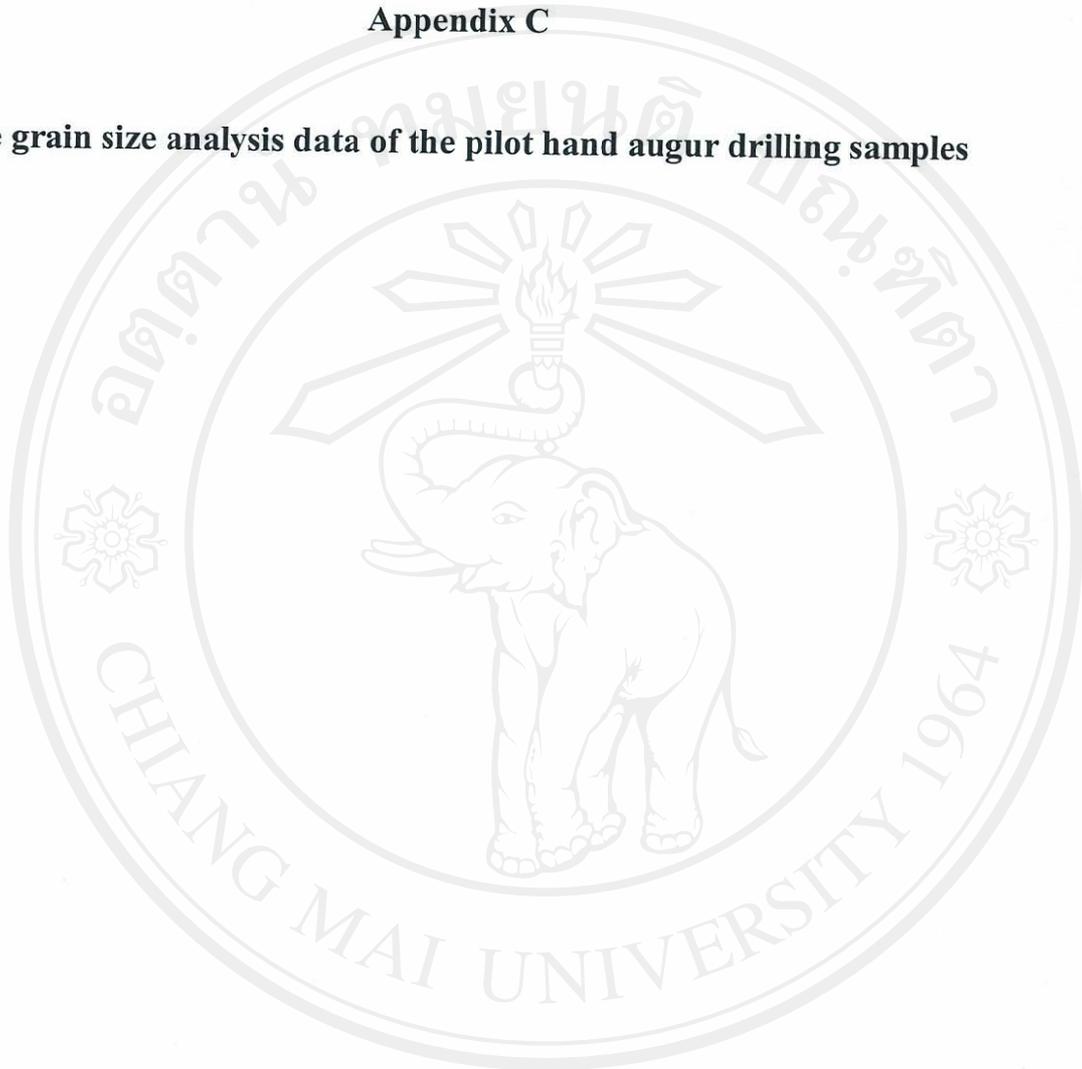

4. Some of the groundwater's field measurements

During the collection on 3rd May 2006, some of field measurements were done.

Observation well no.	Screen depth. (m)	Water level (m)	Conductivity (mS.cm ⁻¹)	pH
MW-MH8 (upgradient)	13	2.5	0.616	6.8
MW-MH3 uw (downgradient)	7	1.8	2.2	7.05
MW-MH L2	4.5	2.1	24.5	7.49
