The completion of this thesis would be impossible without the help of many people, whom I would like to thank. I express my sincere thanks to my advisors Assist. Prof. Dr. Somporn Chantara for her valuable advice and suggestion throughout this work and Assoc. Prof. Dr. Proespichaya Kanatharana for her instructing and providing me with the useful knowledge for my thesis. Thanks are also giving to Assist. Prof. Dr. Yuthsak Vaneesorn for his valuable time as the examination chairperson of this thesis. I would like to thank Miss Chongdee Thammakhet for her guidance in the laboratory and for her supervision.

I would also like to thank: Higher Education Development project: Center for Innovation in Chemistry Postgraduate Education and Research Program in Chemistry, PERCH-CIC, and Funded by the royal Thai government, for the scholarship and research supporting. The Chemistry Departments of Chiang Mai University and Prince of Songkla University.

Staffs of the Department of Chemistry of Chiang Mai University and Prince of Songkla University for their help in the some technical aspects and some constructs of this thesis.

My parents and for their loves and for financial supporting.

And lastly, my friends in Pollution Monitoring Research Laboratory and Analytical & Environment Chemistry /Trace Analysis Research Unit who help in the many way.

Narong Kotchabhakdi
