ACKNOWLEDGEMENTS

First and foremost, I would like to express my sincere thanks and appreciation to my advisor, Asst. Prof. Dr. Orn-anong Arquero, for her kind supervision, invaluable guidance, comments, suggestions and constant encouragement from the beginning to the end of this thesis work. Likewise, I am indebted Dr. Sunanta Wangkarn, Dr. Sakdiphon Thiansem and Dr. Ponlayuth Sooksamiti, my co-supervisors, for their kind assistance, invaluable experimental support, reviewing the manuscript and their helpful discussion. I also would like to express my deep regards to Dr. Christoph Sontag for his recommendations, kind help and examining English grammar of this study.

I would like to gratefully acknowledge the Graduate School of Chiang Mai University for partial support of this research and Suan Dusit Rajabhat University for sponsoring the scholarship throughout the course of this study which made this work possible. I like to express my thanks to the Inorganic Material Research (IMR) unit for partial instrumental support and the staff of Mae Moh power plant for allowing me to collect samples (bottom ash and FGD gypsum) within Mae Moh.

I would like to thank those whose names are not listed here and those who contributed in one way or another to the success of this work. Finally, I give my heartfelt thanks to my parents, elder sisters, younger sister and brother-in-law for their unending love, continual care and large encouragement during my study.
