ACKNOWLEDGEMENTS

First of all, I would like to express my deepest gratitude and sincere appreciation to the thesis advisor, Dr. Mookda Pattarawarapan, for her moral support, advice, excellent guidance, valuable suggestions and encouragement throughout this study. This thesis would not have been accomplished without her gracious assistance.

I wish to extended my special thanks to Assistant Professor Dr. Sirirat Chancharunee (Department of Chemistry, Faculty of Science, Chiang Mai University) and Associated Professor Dr. Duang Buddhasukh (Department of Chemistry, Faculty of Science, Maejo University) for serving on my graduate advisory committee and helping me through the difficulties.

My thanks are extended to the Department of Chemistry, Faculty of Science, Chiang Mai University for kindly providing me with the laboratory and library facilities which have made this study possible. I am also especially thankful to Mr. Singha Komkham for his kind help and sharing knowledge and Mr. Pisan for his help in HPLC works. I am grateful to all staff members of Dr. Mookda's laboratory for their kindness, assistance and friendship.

Finally, I would like to express my deepest gratitude to my family for their infinite love, encouragements and understanding throughout the study.
