	Page
Acknowledgements	iii
Abstract in Thai	iv
Abstract in English	v
Table of contents	vi
List of tables	ix
List of figures	x
List of appendix figures	xii
Chapter 1 Introduction	1
Objectives of the experiments	2
Implementations	2
Chapter 2 Review of Literature	3
1. Botanical characteristics of longan	3
2. Flower induction in longan	4
2.1 Alternate bearing in longan	4
2.2 Hypothesis of flower induction	5
2.3 External factors	6
2.4 Internal factors	9
3. Potassium chlorate and flowering induction of longan	12
3.1 Potassium chlorate property	12
3.2 Potassium chlorate in plant	12

TABLE OF CONTENTS (CONTINUE)

		Page
	3.3 Potassium chlorate in plant physiology	13
	3.4 Effect of potassium chlorate on flowering in longan	14
	4. Molecular methodology in plant physiology	15
	4.1 Molecular methodology	15
	4.2 Application allozymes as a tool in research	19
	4.3 Limitation of protein electrophoresis	21
Chapter 3	Materials and Methods	22
	1. Materials	22
	1.1 Plant materials	22
	1.2 Scientific apparatus	22
	1.3 Chemical reagents	23
	2. Methods	25
	2.1 Experiment 1: Effects of defoliation and girdling on panicle position of potassium chlorate treated trees.	25
	2.2 Experiment 2: Effects of leaves maturity on some isozymes changes in potassium chlorate treated longan trees.	28
	2.3 Experiment 3: Effects of potassium chlorate on changes of proteins in longan leaves during flowering period.	33
Chapter 4	Results	46
Chapter 5	Discussion	64
Chapter 6	Conclusions	68

LIST OF TABLES

Table		Page
1	Treatments of girdling and defoliation of potassium chlorate treated longan trees.	25
2	Isozymes samples loading in each well number.	32
3	The volume of protein samples in each day which contained 20 µg of crude proteins.	39
4	Effect of girdling and defoliation on flowering percentage and site of flowering in longan after treated with potassium chlorate for 28 days.	47
5	The flowering of treated and untreated longan trees on difference leaf ages.	50
6	Total protein contents of longan leaves after flowering induction by potassium chlorate at 10 g/tree.	59
7	The total protein contents in mature leaves of potassium chlorate treated longan trees.	60

LIST OF FIGURES

Figure		Page
1	Fruiting cycle of longan as affected by temperature, nitrogen (N) fertilization and soil water availability.	7
2	Mechanism of reduction of nitrate and chlorate in plant.	13
3	The positions girdling sites, apex or terminal shoot, compound leaves and axillary buds on a longan branch.	27
4	Defoliation sites of longan shoots.	27
5	Components of a BioRAD Mini-Protein 3 gel electrophoresis unit.	30
6	Standard curve of protein (mg/ml) for protein contents analysis in Experiment 3.1: Effect of leaf age on protein contents in longan leaves during flowering period.	35
7	Standard curve of protein (mg/ml) for protein contents analysis in Experiment 3.2: Effects of potassium chlorate on changes of proteins in longan leaves during flowering period	36
8	SE 600 Ruby vertical slab gel unit and accessory.	37
9	Model 422 Electro-Eluter assembly.	42
10	The flowering of longan tree at terminal bud.	48
11	The flowering of longan tree at terminal, 2 nd and 3 rd axillary bud.	48
12	The flowering of treated with 1 st site girdling, 1 st site defoliation and potassium chlorate after the experiments had been finished.	49
13	The flowering of treated with 1 st site girdling, 1 st , 2 nd site defoliation and potassium chlorate after the experiments had been finished.	49

LIST OF FIGURES (CONTINUE)

Figure		Page
14	Peroxidase isozyme patterns and zymograms of 15 days old leaves of longan which treated and untreated with potassium chlorate.	51
15	Peroxidase isozyme patterns and zymograms of 30 days old leaves of longan which treated and untreated with potassium chlorate.	52
16	Peroxidase isozyme patterns and zymograms of 45 days old leaves of longan which treated and untreated with potassium chlorate.	53
17	Esterase isozyme patterns and zymograms of 15 days old leaves of longan which treated and untreated with potassium chlorate.	54
18	Esterase isozyme patterns and zymograms of 30 days old leaves of longan which treated and untreated with potassium chlorate.	55
19	Esterase isozyme patterns and zymograms of 45 days old leaves of longan which treated and untreated with potassium chlorate.	56
20	Shikimic dehydrogenase, malate dehydrogenase, superoxidase dismutase, glucose-6-phosphate dehydrogenase isozyme patterns of 45 days old leaves of longan which treated and untreated with potassium chlorate.	57
21	Graph of the protein contents of longan leaves in 0 – 28 days after treatment.	58
22	The protein patterns of total proteins on longan leaves in treated longan trees.	62
23	The protein patterns of total proteins on longan leaves in untreated longan trees.	62
24	HT profiles of the 17.18 kDa protein sample (residual 1).	63
25	HT profiles of the 33.88 kDa protein sample (residual 2).	63

LIST OF APPENDIX FIGURES

Appendix figure		Page
1	HT profiles of the blank sample.	92
2	HT profiles of the standard protein.	92
3	HT profiles of the 17.18 kDa protein sample (residual 1).	93
4	HT profiles of the 33.88 kDa protein sample (residual 2).	93
