

TABLE OF CONTENTS

Contents	Page
ACKNOWLEDGEMENT	iii
ABSTRACT	v
LIST OF TABLES	xi
LIST OF ILLUSTRATIONS	xiii
ABBREVIATIONS	xv
CHAPTER I INTRODUCTION	1
CHAPTER II LITERATURE REVIEWS	6
A. Structures and molecular biology	6
B. Classification and nomenclatures	10
C. Transmission, pathogenesis, and pathology	13
D. Clinical features, diagnosis, and treatment	14
E. Molecular epidemiology	17
CHAPTER III OBJECTIVES	33
CHAPTER IV MATERIALS AND METHODS	34
1. Fecal specimens	34
2. Preparation of 10% fecal suspension	34
3. Viral RNA extraction	34
4. Reverse transcription (RT) reaction	35
5. Viral target genes and specific-primer pairs binding regions	36

Contents	Page
6. Polymerase chain reaction (PCR) for the detection of Norovirus genogroup I (NVGI)	39
7. Multiplex polymerase chain reaction (Multiplex PCR) for the detection of Norovirus genogroup II (NVGII), Sapovirus (SV), and Human astrovirus (HAstV)	40
8. Nucleotide sequencing of partial capsid genes	41
9. Amino acid sequences and phylogenetic analysis of partial capsid genes	44
CHAPTER V RESULTS	46
1. Prevalence and distribution of Norovirus, Sapovirus, and Human astrovirus infections	46
2. Nucleotide sequences and phylogenetic analyses of partial capsid genes of NV, SV, and HAstV	52
2.1 Analysis of partial capsid gene of NV	52
2.2 Analysis of partial capsid gene of SV	55
2.3 Analysis of partial capsid gene of HAstV	56
CHAPTER VI DISCUSSION	73
CHAPTER VII SUMMARY	82
REFERENCES	83
APPENDIX	109
CURRICULUM VITAE	111

LIST OF TABLES

Table	Page
1. Specific primers for the detection of NVGI, NVGII, SV, and HAstV	38
2. Oligonucleotide primers for nucleotide sequencing of partial capsid genes of NVGI, NVGII, SV, and HAstV	43
3. The prevalence of NVGI, NVGII, SV, and HAstV detected in children hospitalized with acute gastroenteritis in Chiang Mai, Thailand, during May 2000 to March 2002 period	50
4. Age distribution of Norovirus, Sapovirus, and Human astrovirus infections among children hospitalized with acute gastroenteritis in Chiang Mai, Thailand, during May 2000 to March 2002 period	53
5. Nucleotide and amino acid {} sequence identity (%) between 7 NVGI and reference strains in the partial capsid region	59
6. Nucleotide and amino acid {} sequence identity (%) among 7 NVGI strains in the partial capsid region	60
7. Nucleotide and amino acid {} sequence identity (%) between 17 NVGII and reference strains in the partial capsid region	61
8. Nucleotide and amino acid {} sequence identity (%) among 17 NVGII strains in the partial capsid region	62
9. Nucleotide and amino acid {} sequence identity (%) between 10 SV and reference strains in the partial capsid region	66

Table	Page
10. Nucleotide and amino acid { } sequence identity (%) among 10 SV strains in the partial capsid region	67
11. Nucleotide and amino acid { } sequence identity (%) between 7 HAstV and reference strains in the partial capsid region	70
12. Nucleotide and amino acid { } sequence identity (%) among 7 HAstV strains in the partial capsid region	71

LIST OF ILLUSTRATIONS

Figure	Page
1. Three-dimensional structure of Norwalk virus rVLPs viewed along the icosahedral threefold axis at 22 Å resolution as determined by cryo-EM techniques	7
2. A: A central section of Norwalk virus rVLP capsid viewed along the icosahedral 3-fold axis B: Ribbon representation of structure of Norwalk virus rVLP capsid protein	8
3. Diagram illustrating the amplification of partial capsid genes of NVGI, NVGII, SV, and HAstV by PCR	37
4. Agarose gel electrophoresis demonstrating NVGI	48
5. Agarose gel electrophoresis demonstrating NVGII, SV, and HAstV	49
6. Monthly distribution of NVGI, NVGII, SV, and HAstV infections among children hospitalized with acute gastroenteritis in Chiang Mai, Thailand, during May 2000 to March 2002 period as detected by RT-PCR	51
7a. An example of nucleotide sequencing trace profile of partial capsid gene amplicon of NVGI (CMH097/01)	57
7b. An example of nucleotide sequencing trace profile of partial capsid gene amplicon of NVGII (CMH359/00)	58

Figure	Page
8a. Phylogenetic analysis of partial capsid deduced amino acid sequences of NVGI strains detected between the year 2000 to 2002 in Chiang Mai, Thailand	63
8b. Phylogenetic analysis of partial capsid deduced amino acid sequences of NVGII strains detected between the year 2000 to 2002 in Chiang Mai, Thailand	64
9. An example of nucleotide sequencing trace profile of partial capsid gene amplicon of SV (CMH283/01)	65
10. Phylogenetic analysis of partial capsid deduced amino acid sequences of SV strains detected between the year 2000 to 2002 in Chiang Mai, Thailand	68
11. An example of nucleotide sequencing trace profile of partial capsid gene amplicon of HAstV (CMH265/00)	69
12. Phylogenetic analysis of partial capsid deduced amino acid sequences of HAstV strains detected between the year 2000 to 2002 in Chiang Mai, Thailand	72

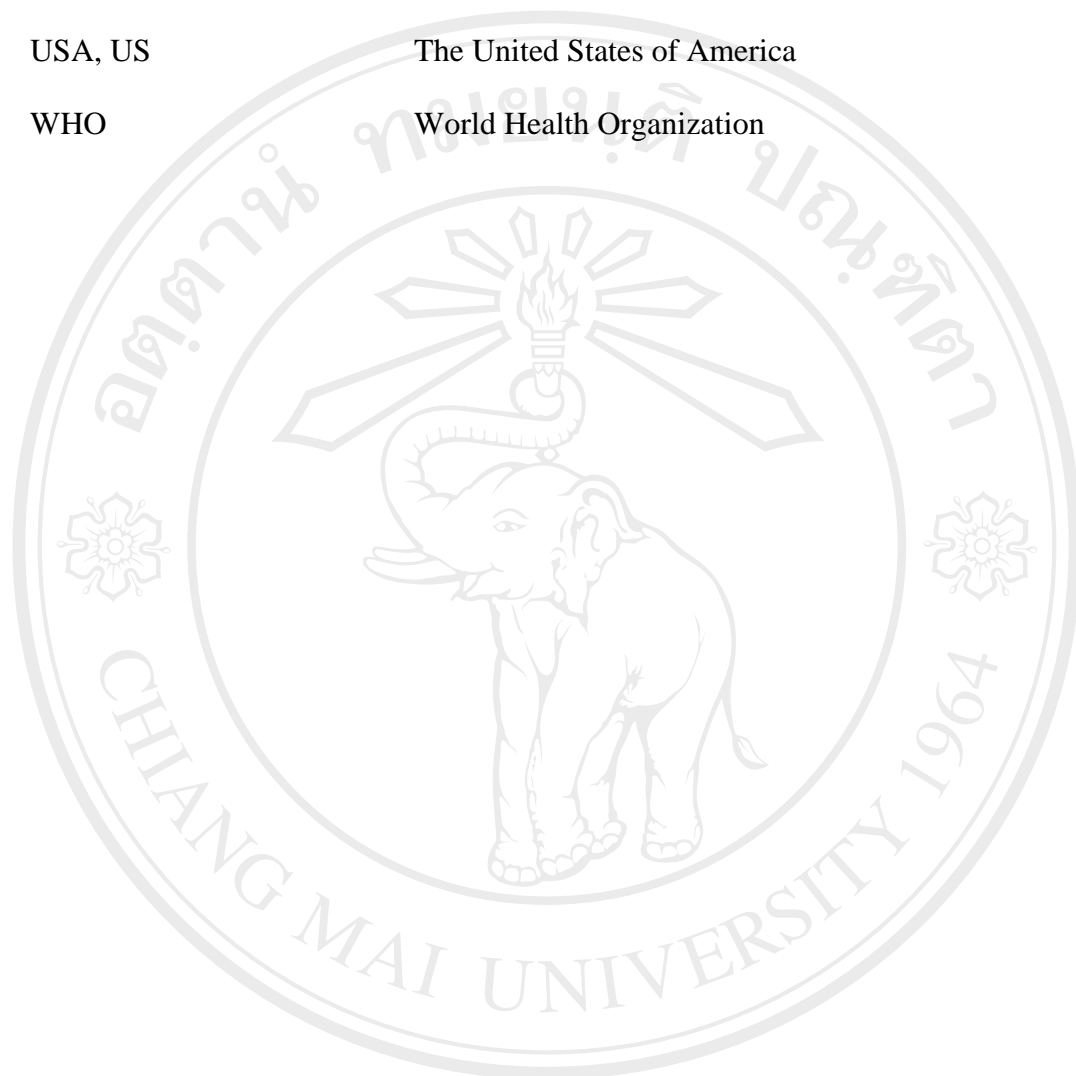

ABBREVIATIONS

%	Percent
µg	Microgram
µl	Microliter
µM	Micromolar
bp	Base pair
CDC	Centers for Disease Control and Prevention
cDNA	Complementary deoxyribonucleic acid
DEPC	Diethyl pyrocarbonate
DNA	Deoxyribonucleic acid
dNTP	Deoxyribonucleotide triphosphate
EDTA	Ethylenediaminetetraacetic acid
EIA	Enzyme immunoassay
ELISA	Enzyme-Linked Immunosorbent Assay
EM	Electron microscopy
G	Genogroup
g	Gram
HAstV	Human astrovirus
Hu	Human
IEM	Immune electron microscopy
kb	Kilobase

M	Molar
mg	Milligram
min	Minute
ml	Milliliter
nm	Nanometer
NSTDA	National Science and Technology Development Agency
nt	Nucleotide
NV	Norovirus
NVGI	Norovirus genogroup I
NVGII	Norovirus genogroup II
°C	Degree Celsius
ORF	Open reading frame
PBS	Phosphate buffered saline
PCR	Polymerase chain reaction
pmol	Picomolar
RNA	Ribonucleic acid
RNase	Ribonuclease
rpm	Revolutions per minute
RT	Reverse transcriptase
RT-PCR	Reverse transcription-polymerase chain reaction
rVLPs	Recombinant virus-like particles
sec	Second
SV	Sapovirus
<i>Taq</i>	<i>Thermus aquaticus</i>

TBE	Tris-borate EDTA
UK	The United Kingdom
USA, US	The United States of America
WHO	World Health Organization
