## ACKNOWLEDGEMENTS

I would like to express my deepest and sincere gratitude to my supervisor, Assoc. Prof. Dr. Busaban Sirithunyalug, for her valuable instruction, expected guidance, kindness which are more than I can describe here, throughout this work.

My sincere thanks are express to my co-advisor, Asst. Prof. Dr. Sirivipa Piyamongkol and Dr. Prasat Kittakoop. I also extend my thank to Assoc. Prof. Dr. Nongluksna Sriubolmas her time and kindness for Microbiology as well as Assoc. Prof. Dr. Palangpon Kongsaree for X-ray crystallographic analysis.

My special thanks are dedicated to the technical staffs of thank the National Center for Genetic Engineering and Biotechnology (BIOTEC), National Science and Technology Development Agency (NSTDA) to the Chulabhorn Research Institute (CRI) for providing assistance in obtaining spectral data.

Unforgettably, I would like to express my gratitude to all the members in the Natural Products at CRI for friendship, co-operation and excellent assistance at various points during my work on this thesis.

I would like to acknowledge the BIOTEC Fermentation and Biochemical Engineering Laboratory, BIOTEC Mycology laboratory, BIOTEC Culture Collection, and Bioassay Research Facilities at BIOTEC and Laboratory of Chemical Carcinogenesis and Laboratory of Immunology at CRI for various biological evaluations.

Finally, I am very grateful to Rangsit University, Chiang Mai University, National Research Council of Thailand and The Graduate School for my Ph.D. scholarship.

All of these are deep-seated in my mind forever.

Thitaree Theerachayan
