

## OBJECTIVES

The objectives of the present study were to

1. obtain pharmacokinetic parameters of donepezil HCl that have never been available in Thai subjects.
2. compare the rate and extent of absorption of a generic donepezil HCl 5-mg tablet formulation with that of the reference formulation when given as equal dose.
3. provide information regarding the quality of donepezil HCl manufactured in Thailand and whether this generic donepezil HCl could be used as an alternative to the innovator donepezil HCl when donepezil HCl therapy is required for Thai patients with AD.
