ACKNOWLEDGEMENTS

I wish to express my deepest gratitude and appreciation to Assoc. Prof. Dr. Ampai Panthong. This thesis could not have been completed without her excellent instruction, guidance, encouragement and constructive criticism.

I am greatly indebted to all staff in Department of Pharmacology, Faculty of Medicine, Chiang Mai University, especially Assoc. Prof. Dr. Duangta Kanjanapothi, Asst. Prof. Dr Tawat Taesotikul, my thesis co-advisors. My deepest thankfulness is extended to Dr. Parirat Khonsung for her devotion, enthusiastic teaching and suggestions throughout this research endeavor.

I am very grateful to Assoc. Prof. Dr Chaichan Sangdee for improving the English language of this thesis and for the excellent instruction in preparing my examination.

I owe special gratitude to Prof. Dr. Vichai Reutrakul from the Department of Chemistry, Faculty of Science, Mahidol University, for providing the plant extract and supplying animals used in this research.

I also wish to express my thanks to all my friends in the Pharmacology Laboratory for their kind assistance, special support, encouragement and memorable friendship.

Finally, I am especially grateful to all members of my family, who have been remarkably supportive and extremely helpful, and for their understanding, mental support, and encouragement.
