ACKNOWLEDGEMENTS

I would like to express my true gratitude and admiration to Assoc. Prof. Dr. Siriporn Okonogi and Prof. Dr. Helmut Viernstein for their limitless patience, constant encouragement, and invaluable guidance throughout my graduate study. Without their support and guidance, this learning experience would not have been possible.

I would also like to thank Assoc. Prof. Dr. Jakkapan Sirithanyalug, the member of my dissertation committee for his invaluable advice. I am also appreciative to Asst. Prof. Dr. Songwut Yotsavimonwat and Dr. Tawatchai Sumpradit for serving as committee. In addition, I would like to thank Prof. Dr. Frank M. Unger, Dr. Diana Berner, and Dr. Sharareh Salar-Behzadi, staff of Department of Pharmaceutical Technology and Biopharmaceutics, University of Vienna, for providing constant technical and moral support, assistance, cooperation, and invaluable friendship throughout my study in Austria.

I am also greatly indebted to Prof. Dr. Wolfgang Kneifel for kindly offering me a great opportunity to work on molecular techniques. Furthermore, I wish to thank Dr. Konrad Domig and Dr. Beatrix Kögler at the Division of Food Microbiology and Hygiene, Department of Food Science and Technology, University of Natural Resources and Applied Life Sciences, Vienna for their valuable assistance and practical help.

I am thankful for the financial supports provided by Commission on Higher Education, Royal Golden Jubilee Ph.D. Program, and Graduate School Foundation of Chiang Mai University, which are gratefully acknowledge. I also wish to thank to Maejo University for laboratory equipment and facilities and provide my thanks to Assist. Prof. Dr. Piyanuch Niamsup for her 16S rRNA sequence analytical advices.

Finally, I give my wholehearted thanks to my father and my mother for their love, although they not live long enough to see my Ph.D. dissertation. I also deeply thank to my sister who always cheer up me and provide all things. Any error in this dissertation remains my sole responsibility.
