ACKNOWLEDGEMENT

I would like to express my sincere gratitude and appreciation to my advisor, Assistant Professor Dr. Chaiyavat Chaiyasut, for his valuable suggestion of the problems, guidance, and continuous encouragement throughout my study. He always forgives all my mistakes and also all students in our laboratory.

I would also like to express my special appreciation thanks to members of advisory committee, my co-advisor, Professor (Emeritus) Dr. Maitree Suttajit and Assistant Professor Dr. Sunee Chansakaow, for their kindness, helpful guidance, and valuable suggestion. This thesis would not be accomplished without their great comment and kindness understanding.

Great acknowledgements are also to the TRF-MASTER RESEARCH GRANTS 2005, Thailand Research Fund (TRF) for the research grant support.

A special acknowledgement is extended to the Department of Pharmaceutical Sciences, Faculty of Pharmacy, Chiang Mai University, for providing the opportunity to study in the program of Master Degree of Sciences.

Also, I would like to thank the staffs of the Department of Pharmaceutical Sciences, Faculty of Pharmacy, Chiang Mai University, for their help.

Finally, I wish to express my sincere and deepest gratitude to my parents who are always in my mind, for their understanding, encouragement and precious spiritual support throughout my thesis.
