

## TABLE OF CONTENTS

	PAGE
ACKNOWLEDGEMENT	iii
ABSSTRACT (IN ENGLISH)	iv
ABSSTRACT (IN THAI)	vi
LIST OF TABLES	ix
LIST OF ILLUSTRATIONS	xi
ABBREVIATION AND SYMBOLS	xiv
CHAPTER I INTRODUCTION	1
CHAPTER II MATERIALS AND METHODS	12
CHAPTER III RESULTS	19
CHAPTER IV DISCUSSION	65
REFERENCES	73
CURRICULUM VITAE	78

## LIST OF TABLES

TABLES	PAGE
1 Chemical residues found in fresh vegetable samples	4
2 Effects of multiple doses of dicotophos on acetylcholinesterase activity in plasma.	20
3 Effects of multiple doses of dicotophos on acetylcholinesterase activity in RBC.	22
4 Effects of multiple doses of dicotophos on acetylcholinesterase activity in brain.	24
5 Effects of multiple doses of dicotophos on nerve conduction velocity in sciatic nerve	27
6 Effects of multiple doses of dicotophos on number and minimum diameter of myelinated axon in sciatic nerve	30
7 Effects of multiple doses of dicotophos on minimum thickness of myelin sheath in sciatic nerve	33
8 Effects of multiple doses of dicotophos on number and minimum diameter of unmyelinated axon in sciatic nerve	36
9 Effects of multiple doses of dicotophos on number and minimum diameter of myelinated axon in fasciculus gracilis at medullary level	42
10 Effects of multiple doses of dicotophos on minimum thickness of myelin sheath in fasciculus gracilis at medullary level	45

## LIST OF TABLES (CONTINUED)

TABLES	PAGE
11 Effects of multiple doses of dicotophos on number and minimum diameter of unmyelinated axon in fasciculus gracilis at medullary level	48
12 Effects of multiple doses of dicotophos on number and minimum diameter of myelinated axon in fasciculus gracilis at cervical spinal cord level	54
13 Effects of multiple doses of dicotophos on minimum thickness of myelin sheath in fasciculus gracilis at cervical spinal cord	57
14 Effects of multiple doses of dicotophos on number and minimum diameter of unmyelinated axon in fasciculus gracilis at cervical spinal cord level	60

## LIST OF ILLUSTRATIONS

FIGURES	PAGE
1      Inhibition of acetylcholinesterase by OP insecticide	2
2      Structure of dicotophos	5
3      Schematic presentation of experimental protocol	13
4      A schematic representation of nerve conduction study	17
5      Effects of multiple doses of dicotophos on acetylcholinesterase activity in plasma	21
6      Effects of multiple doses of dicotophos on acetylcholinesterase activity in RBC	23
7      Effects of multiple doses of dicotophos on acetylcholinesterase activity in brain	25
8      Effects of multiple doses of dicotophos on nerve conduction velocity in sciatic nerve	28
9      Effects of multiple doses of dicotophos on number of myelinated axon in sciatic nerve	31
10      Effects of multiple doses of dicotophos on minimum diameter of myelinated axon in sciatic nerve	32
11      Effects of multiple doses of dicotophos on minimum thickness of myelin sheath in sciatic nerve	34

## LIST OF ILLUSTRATIONS (CONNTINUED)

FIGURES	PAGE
12 Effects of multiple doses of dicotophos on number of unmyelinated axon in sciatic nerve	37
13 Effects of multiple doses of dicotophos on minimum diameter of unmyelinated axon in sciatic nerve	38
14 Light micrographs of cross section taken from sciatic nerve	39
15 Electron micrographs of cross section taken from sciatic nerve	40
16 Effects of multiple doses of dicotophos on number of myelinated axon in fasciculus gracilis at medullary level	43
17 Effects of multiple doses of dicotophos on minimum diameter of myelinated axon in fasciculus gracilis at medullary level	44
18 Effects of multiple doses of dicotophos on minimum thickness of myelin sheath in fasciculus gracilis at medullary level	46
19 Effects of multiple doses of dicotophos on number of unmyelinated axon in fasciculus gracilis at medullary level	49
20 Effects of multiple doses of dicotophos on minimum diameter of unmyelinated axon in fasciculus gracilis at medullary level	50
21 Light micrographs of cross section taken from the medullary portion of the fasciculus gracilis	51

## LIST OF ILLUSTRATIONS (CONNTINUED)

FIGURES		PAGE
22	Electron micrographs of cross section taken from the medullary portion of the fasciculus gracilis	52
23	Effects of multiple doses of dicotophos on number of myelinated axon in fasciculus gracilis at cervical spinal cord level	55
24	Effects of multiple doses of dicotophos on minimum diameter of myelinated axon in fasciculus gracilis at cervical spinal cord level	56
25	Effects of multiple doses of dicotophos on minimum thickness of myelin sheath in fasciculus gracilis at cervical spinal cord level	58
26	Effects of multiple doses of dicotophos on number of unmyelinated axon in fasciculus gracilis at cervical spinal cord level	61
27	Effects of multiple doses of dicotophos on minimum diameter of unmyelinated axon in fasciculus gracilis at cervical spinal cord level	62
28	Light micrographs of cross section taken from the cervical spinal cord level of the fasciculus gracilis	63
29	Electron micrographs of cross section taken from the cervical spinal cord level of the fasciculus gracilis	64

## ABBREVIATIONS AND SYMBOLS

ACh	Acetylcholine
AChE	Acetylcholinesterase
BW	Body weight
°C	Degree Celsius
ChE	Cholinesterase
cm	Centimeter
CNS	Central nervous system
DFP	Diisopropyl fluorophosphates
EMG	Electromyogram
ER	Endoplasmic reticulum
g	Gram
GroPCho	Glycerophosphocholine
hr	Hour
i.p.	Intraperitoneal
kDa	Kilodaltons
Kg	Kilogram
L	Litre
mg	Milligram
ml	Millilitre
MNCV	Motor nerve conduction velocity
ms	Millisecond

## ABBREVIATIONS AND SYMBOLS

mM	Millimolar
MV	Millivolt
NSS	Normal saline solution
NTE	Neuropathy target esterase
μm	Micrometer
OP	Organophosphate
OPIDN	Organophosphorus-ester induced delayed neuropathy
PNS	Peripheral nervous system
PtdCho	Phosphatidylcholine
RBC	Red Blood Cell
SE	Standard Error
SWS	Swiss cheese protein
TOCP	Tri- <i>ortho</i> -cresyl phosphate
TOTP	Tri- <i>ortho</i> -tolyl phosphate
U	Unit
wk	Week
W/V	Weight/Volume
%	Percentage
