ACKNOWLEDGEMENT

I am extremely indebted to the valuable advice, knowledge comments and the kind encouragement of Asst. Prof. Dr. Chucheepp Praputpittaya, my thesis advisor, who gave me the opportunity to do this research. This thesis would not have been completed successfully, without helps from my co-advisors, Assoc. Prof. Dr. Pramote Vanittanakom, Department of Pathology, Faculty of medicine and Asst. Prof. Dr. Apisate Pleumsamran, Department of Physiology, Faculty of medicine, Chiang Mai University who have provided the excellent and continuous useful guidance for this research project from the beginning to the finish line of this thesis. Thanks for all facilities in the Department of Physiology, Faculty of Medicine, Chiang Mai University.

I would like to thank all instructors in the Department of Physiology, Faculty of Medicine, Chiang Mai University for their teaching and suggestion throughout the period of my graduate study

I would like to thanks all members in Department of Physiology for their kind help, understanding and friendship.

This study was granted by the Faculty of Medicine Research fund. Therefore, I would like to express my thanks for valuable support.

Finally, I am also very grateful to my family for their love, inspiration and understanding throughout my life.

WICHUDA RUAMKRATHOK
