## ACKNOWLEDGEMENTS

I would like to express my deepest thanks and profound appreciation to Prof. Dr. Chayan Vaddhanaphuti, my academic advisor, for his insightful and keen instructions and guidance throughout my study. I would also like to express sincere appreciation to Dr. Chusak Wattayapak, who was my thesis examination committee member and general supervisor during my study period, and Dr. Ron Renard, my external committee member for his excellent comments and suggestions in guiding me to improve my thesis.

My deepest thanks are extended to the teachers on the study course of the M.A in Sustainable Development at RCSD: Professor Dr. Chayan Vaddhanaphuti, Professor Dr. Anan Ganjanapan, Associate Prof. Dr. Chusak Wattayapak, Dr. Santita Ganjanapan, Dr. Pinkaew Laungaramsri, Lecturer Phreak Gypmantasiri, and Lecturer Ekamol Saichan, who taught me useful knowledge in the field of sustainable development while I undertook my graduate studies there for two years. I am thankful to the staff at RCSD for their assistance in accounting for all the complicated administrative procedures related to my scholarship, credit registration and everything else necessary for me to complete my studies.

I would not have been able to study without financial support from the Heinrich Boll Foundation, an NGO from Germany. I would like to simply and deeply thank Dr. Heike Loschmann, who is a Director from the Heinrich Boll Foundation office, Chiang Mai and all of the other staff from that office. I especially thank Ms. Mattana Gosoomp, the coordinator from this office, for her kindness and help when I arrived in Chiang Mai.

My sincere thanks go to all the academic and administrative staff at RCSD, who provided me a homely and friendly environment during my study period at Chiang Mai University.

Most of all, I offer with this acknowledgement great thanks to my father U Ngwe Htun and my mother Daw Htay Shin, who live in Yangon, Myanmar. They have always offered their love, inspiration, support and encouragement for me to

continue my academic education. Also, I offer sincere appreciation to my beloved wife Daw Nwe Maw Aung, for her encouragement and valued support for my studies and to my daughter May Me Moe Pwint Phyu as well.

I also would like to express my grateful thanks to U Sein Maung Wint, Chairman of FREDA; U Soe Kyi, Vice Chairman; U Ohn, General Secretary; U Myint Than, Secretary of Finance and all the other executive members who arranged for me to study for my M.A (Sustainable Development) at Chiang Mai University.

My profound gratitude is also extended to the villagers from my study village, who helped me full time during my field work in Oakpo-Kwin-Chaung, Bogale Township, Ayeyarwaddy Delta, Myanmar. Finally, I extend thanks to my many friends from the Forest Department Head Office, the staff officer from the Bogale Forest Department and the local forest official from my study village, who provided me with up-to-date data about the forest in my study area.

Khin Maung Htay
