ACKNOWLEDGEMENT	iii
ABSTRACT IN ENGLISH	v
ABSTRACT IN THAI	vii
LIST OF TABLES	xi
LIST OF ILLUSTRATION	xii
ABBREVIATIONS AND SYMBOLS	xiii
1. INTRODUCTION	
1.1 Background and Significance	1
1.2 Objectives	2
2. LITERATURE REVIEW	
2.1 Avian influenza	
2.1.1 Aetiology	4
2.1.2 Epidemiology	5
2.1.3 Clinical signs of poultry	6
2.1.4 Pathology	8
2.1.5 Lab diagnosis of avian influenza virus	10
2.2 Avian influenza as public health issues	14
2.3 Wild birds and avian influenza	
2.3.1 Wild birds as reservoirs	16

2.3.2 HPAI H5N1 transmission in the wild birds	18
2.4 Resident birds and avian influenza	20
2.5 City pigeons	
2.5.1 Identification	21
2.5.2 Habitat and general behavior	22
2.5.3 Problems aroused by city pigeons	24
2.5.4 City pigeons as resident birds and avian influenza	24
3. MATERIAL AND METHODS	
3.1 Place of sample collection	
3.1.1 Background information of Harbin city pigeons	34
3.1.2 Sample sites	35
3.2 Sample size determination	35
3.3 Collection of the pigeons from the retailers in the LBM	36
3.4 Types of Samples	
3.4.1 Oropharyngeal swabs	40
3.4.2 Cloacal swabs	40
3.4.3 Sera collection	40
3.5 Lab diagnostic methods	
3.5.1 Virus isolation	42
3.5.2 Virus detection	44
3.5.3 Serological tests	47

4. RESULTS	
4.1 Result interpretation	
4.1.1 Serological tests results	50
4.1.2 Virus detection and isolation of avian influenza virus	51
4.2 Alternative explanation	
4.2.1 Maximum probable prevalence	54
4.2.2 Selection of the live birds markets	54
4.2.3 Positive Ab level against H9 AIV and NDV	55
5. DISCUSSION AND CONCLUSION	
5.1 The infectious status of AIV of pigeons in Harbin City	56
5.2 The veterinary public health strategies toward the risk of Pigeon avian influenza by Chinese government	57
5.2.1 the vaccination and flying limitation of city pigeons	57
5.2.2 the strengthened administration of racing pigeons	58
5.2.3 the new slaughter routines of meat pigeons	59

DECLARATION	73
CURRICULUM VITAE	74

LIST OF TABLES

Table	Page
3.1 The background information and coding system of the pigeon retailers	37
3.2 The schedule of the weekly sampling in different durations	38
3.4 Primers used in this experiment	45
4.1 The serological tests positive results statistics	50

LIST OF FIGURES

Figure	Page
1.1 H5N1 outbreaks in 2005 and major flyways of migratory birds	3
3.1 The Pigeon collecting distribution among 15 different holders	39
3.2 The flow chart of the diagnostics methods	41
3.3 The determination of haemagglutination	48
4.1 Fragment amplified from 3 pairs of primers H5/591, H7/525 and H9/808	51
4.2 Fragment amplified results of sample 1, 2 and 3 by M/1015	52
4.3 Fragment amplified results of sample 1, 2 and 3 by H5/591	52
4.4 Fragment amplified results of sample 1, 2 and 3 by H7/525	53
4.5 Fragment amplified results of sample 1, 2 and 3 by H9/808	53

ABBREVIATIONS AND SYMBOLS

%	percent
°C	degree Celsius
μl	microlitre (s)
μm	micrometer (s)
Ab.	Antibody (ies)
Ag.	Antigen (s)
AIV	Avian Influenza Virus
CMU	Chiang Mai University (Thailand)
e.g.	<i>exempli gratia</i> (Latin), for example
ELISA	Enzyme-linked Immunosorbent Assay
<i>et al.</i>	<i>et alii</i> (Latin), and others
FAO	Food Agriculture Organization
FU Berlin	Freie Universität Berlin (Germany)
G, g	gram(s)
HA	Haemagglutination Activity
HI	Haemagglutination Inhibition
HPAI	Highly Pathogenic Avian Influenza
IVPI	Intravenous Pathogenicity Index
MVPH	Master of Veterinary Public Health
LBM	Live Birds Market

LPAI	Low Pathogenic Avian Influenza
OIE	World Organization for Animal Health
PCR	Polymerase Chain Reaction
RBC	Red blood cell
RCVPH	Regional Centre for Veterinary Public Health
RT-PCR	Reverse Transcriptase Polymerase Chain Reaction
SPF	Specific Pathogen Free
