ACKNOWLEDGEMENT

First of all, I would like to express my gratitude to my thesis advisors, Prof. Dr. Reinhard Fries, Dr. Anucha Sirimalaisuwan for their supervision and guidance throughout this research study.

I would also like to express my gratitude to Prof. Karl Haans Zessin, Dr. Max Baumann and Assoc. Prof. Dr. Lertrak Srikitjakarn for giving me an opportunity to study about the interesting *Salmonella* and for their attention, recommendation and help in overcoming obstacles throughout this study.

I am deeply grateful to Asst. Dr. Kwanchai Kreausukon, Asst. Prof. Dr. Pawin Padungtod and Mrs. Rose Schmitz. Their helpful advice and nice support were excellent.

Special thanks to all laboratory staffs and technicians at the Department of Veterinary Public Health, Faculty of Veterinary Medicine, Chiang Mai University.

My grateful thanks to all staffs at Center of Veterinary Public Health of Asia Pacific and all staffs at the Institute of Meat Hygiene and Technology, Freie Universitat Berlin and all staffs members at the farms.

Many thanks to my colleagues, Miss Ruttayaporn Ngasaman, Miss Warangkana Chaisawwong and Miss Nattakarn Awaiwanont who were helpful with sample collection at the farm and for their help assistance with laboratory work.

Finally, I would like to dedicate all my work to my beloved family, Mr. Thanadet and Mrs. Paporn Sangvatanakul (parents), Fan, Fa, Four, Five, Fix, Fud and Fair (sisters and brothers). They always stand aside me and give me an encouragement all time. I am so proud of my family.

Phengjai Sangvatanakul
