ACKNOWLEDGEMENTS

First and foremost, I would like to express my sincere thanks and appreciation to my advisor, Asst. Prof. Dr. Supaporn Kradtap Hartwell, for her kind supervision, invaluable guidance, comments, suggestions and constant encouragement from the beginning to the end of this thesis work and helping me succeed in writing this thesis.

The author is sincerely grateful to Prof. Dr. Kate Grudpan, Dr. Jaroon Jakmune, Asst. Prof. Dr. Somchai Lapanantnoppakhun and Dr. Torpong Sanguansermisri for their valuable comments, guidance and discussion.

The author gratefully acknowledges the Center of Excellent for Innovation in Chemistry (PERCH-CIC) for granting and awarding her full scholarship throughout the study. The author thanks the Department of Chemistry, Faculty of Science, Chiang Mai University for supports and the Thalassemia Laboratory Maharaj Nakorn Chiang Mai Hospital, Chiang Mai University for blood samples.

I would like to thank the members of Flow Based Analysis Group, all the friends whose name are not listed here, that contributed to the success of this work.

Finally, I give my heartfelt thanks to my parent, a younger sister of my father, a paternal grandmother and my close friends for their unending love, continual care and large encouragement during my study.

Warisara Khotchakit
