## ACKNOWLEDGEMENTS

I would like to thank all those who gave me the opportunity to complete this thesis. This research study is supported financially by the Commission on Higher Education (Ph.D Grant). I also thank the Graduate School, Chiang Mai University, for partial financial support. I would like to thank the Department of Chemistry, Chiang Mai University and Rajabhat Chiang Mai University for their support.

I am grateful to Dr. Pichai Pirakitikulr of the Faculty of Pharmacy, Payap University, Chiang Mai for supplying seedlac, Assoc.Prof. Hattaya Kaweewong of the Department of Biology, Chiang Mai University for the chromosome dyeing test of black sticky rice, and Dr. Apiwat Baramee, Asst.Prof. Dr. Anansawake Haewsungjarern, Assoc.Prof. Dr.Sugunya Wongpornchai and all members of Buddhasukh's research group for their discussions and suggestions.

I would like to thank Prof. Minoru Isobe of the Laboratory of Organic Chemistry, School of Bioagriculture Science, Nagoya University, Japan, who gave me precious suggestions and a good opportunity to join his research group.

I am deeply indebted to my supervisor Assoc.Prof.Dr. Duang Buddhasukh who gave me a large number of precious suggestions and helped me in all the time of research and in the writing of this thesis.

Especially, I would like to give my special thanks to my parent who support me all the time.

**Neeranuch Chairungsi**
