ACKNOWLEDGEMENTS

I would sincerely like to express my gratitude to the following peoples who contributed to the research and to this thesis in particular. Without their encouragement and inspiration, this thesis would not have been completed.

First, I would like to thank my advisor, Dr. Urai Tengjaroenkul, for her unwavering support and continuously valuable guidance throughout the study and research. She has provided advice, criticism, and encouragement whenever needed since I started my program at Chiang Mai University. I am also deeply grateful to Assistant Professor Dr. Somporn Chantara of the Department of Chemistry, Faculty of Science, Chiang Mai University and Associate Professor Dr. Bundit Tengjaroenkul of the Department of Medicine, Faculty of Veterinary Medicine, Khon Kaen University, my committee member, for their worthy comments and suggestion.

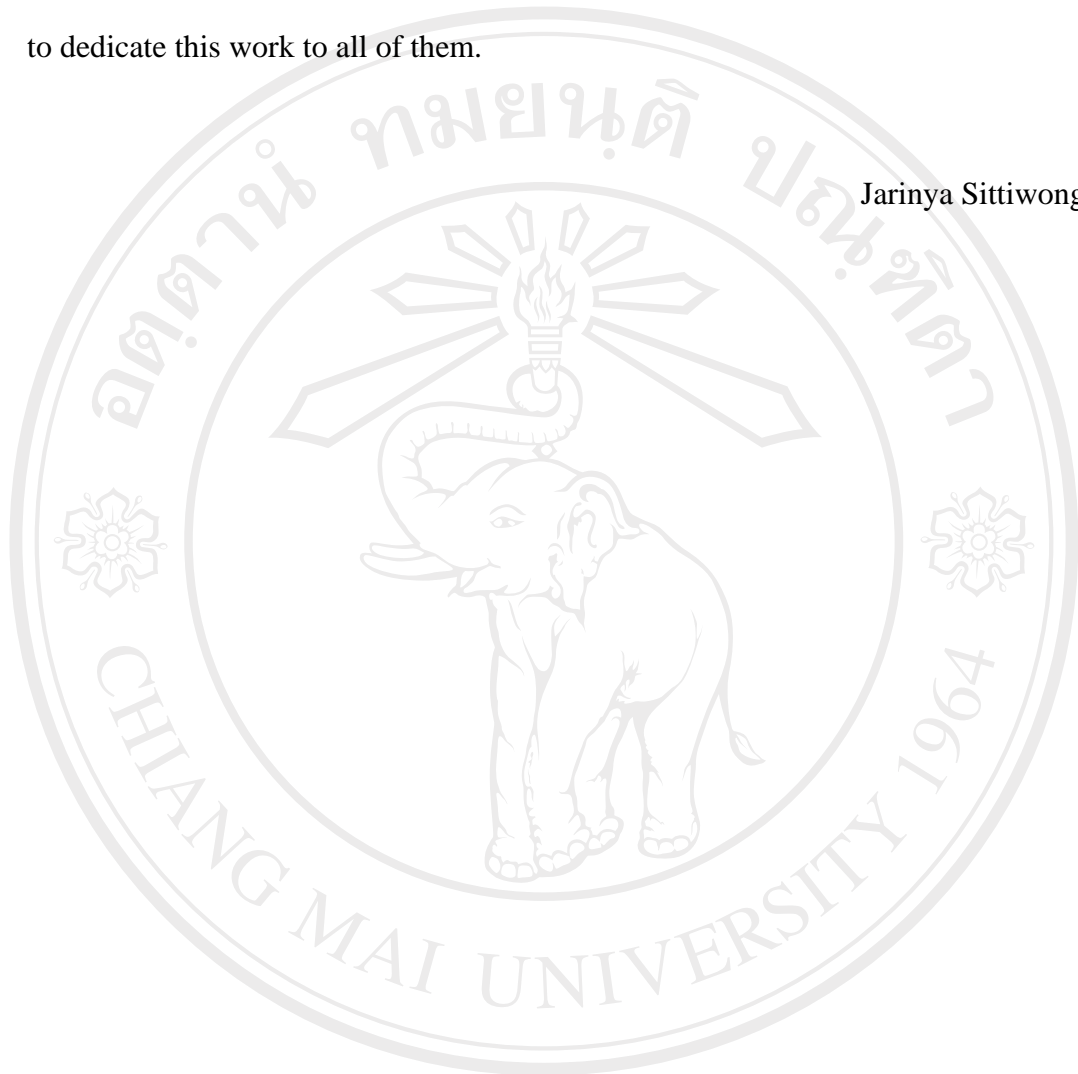

I wish to thank Assistant Professor Dr. Apinpus Rujiwatra for her support on supplying zeolite samples for this research.

I would like to express the Center for Innovation in Chemistry: Postgraduate Education and Research Program in Chemistry (PERCH-CIC) for postgraduate scholarship and research financial support. Thailand Research Fund and the Graduate School Chiang Mai University are also recognized.

My gratitude is expressed to technicians and researchers of the Department of Chemistry, Department of Industrial Chemistry, Faculty of Science, Chiang Mai University for their help in various ways during this work, the valuable advice, assistance.

Finally, the author is deeply indebted to her beloved mother, father, and sister for their generous support and invaluable encouragement. Also, the author would like to dedicate this work to all of them.

Jarinya Sittiwong
