ACKNOWLEDGEMENT

This thesis could not be completed without the assistance of Assistant Professor Dr. Sanpawat Kantabutra, my thesis advisor, who gave me ideas and suggestions and went over the thesis until this work was done. I would like to express my sincere gratitude to him.

I would like to thank Professor Dr. Raymond Greenlaw for agreeing to be the Chairperson of the thesis defense committee, Assistant Professor Dr. Jittat Fakcharoenphol and Lecturer Dr. Noparut Vanitchanant for sitting on the thesis defense committee and giving some valuable comments. I extend my thanks to Mrs. Nipa Winit for sponsoring the Supit Kantabutra Scholarship for Academic Excellence, the Graduate School Scholarship Fund to support the research of graduate students, all of my teachers for many valuable lectures, all officers at the Computer Science Department in the Faculty of Science in Chiang Mai University for handling all my documents and transactions, all members in The Theory of Computation Group for giving me expertise, and my family who supported, suggested, and gave me the strength to do everything. I would also like to thank Chiang Mai University for a good studying environment.
