ACKNOWLEDGEMENT	iii
ABSTRACT (IN ENGLISH)	v
ABSTRACT (IN THAI)	vii
LIST OF TABLES	xii
LIST OF FIGURES	xiv
CHAPTER I	
INTRODUCTION	
PRINCIPLE AND RATIONALE	1
OBJECTIVES	4
CHAPTER II	
LITERATURE REVIEW	
General information of Chiang Mai	5
<i>Ficus</i> studies in Thailand	12
Classification of <i>Ficus</i>	13
Classification of fig wasps	21
Biology of figs and fig wasps	26
Pollination and oviposition	42
Evolution of pollination and oviposition	46
Phylogenetic studies	51
Dispersal	52

## TABLE OF CONTENT (CONTINUED)

	Page
Germination	54
<b>CHAPTER III</b>	
<b>METHODOLOGY</b>	
Taxonomic study	56
Fig tree	56
Fig wasp	57
Pollination study	59
<b>CHAPTER IV</b>	
<b>TAXONOMIC STUDY OF SOME FIGS AND THEIR POLLINATORS</b>	
Taxonomic study	64
Characters of <i>Ficus</i>	68
Characters of fig wasps	69
Ecology and distribution	121
Discussion and conclusion	124
<b>CHAPTER V</b>	
<b>INTERACTION BETWEEN FIG AND THEIR POLLINATORS</b>	
DIOECIOUS FIG	135
Introduction	135
Literature review	136

CURRICULUM VITAE	182

## LIST OF TABLES

Table	Page
2.1 Types and characters of bracts in <i>Ficus</i>	16
2.2 The genera of the Indo-Australian Agaoninae and the groups of their host figs	21
2.3 Some features of monoecious and (gyno) dioecious figs	29
2.4 Hymenoptera reared from fig inflorescences in alphabetical order	47
4.1 <i>Ficus</i> and their pollinators' checklist in Chiang Mai during June 2005-May 2007.	65
4.2 The characters, habits and appearance of <i>Ficus</i> and their pollinators in Chiang Mai during June 2005-May 2007	122
5.1 Temperature (°C) of the University of Leeds glasshouse during the study from November 2005 to June 2006	139
5.2 The features component of <i>Ficus montana</i> in pollen-free experiment (treatment)	142
5.3 The features component of <i>Ficus montana</i> figs in pollen-free experiment (control)	143
5.4 The chi-square test of abortion <i>F. montana</i> figs in pollen-free experiment	144
5.5 The contents of <i>F. montana</i> figs that completed their development following the introduction of a single pollen-carrying or	

pollen-free foundress.

146

## LIST OF TABLES (CONTINUED)

Table		Page
5.6	The chi-square test of abortion figs in prevention oviposition experiment.	149
5.7	Six phases of fig development in monoecious species	154
5.8	The locations of sampling fig <i>F. racemosa</i> in urban area of Chiang Mai	156
5.9	The number of figs, seeds and pollinator wasps in dry and rainy season between September 2006-September 2007	160

## LIST OF FIGURES

Figure	Page
1.1 Distribution of <i>Ficus</i> species in the tropic zone	2
2.1 Map of Northern Thailand	6
2.2 Map of Geography and topology of Chiang Mai	8
2.3 Temperature (°C) of Chiang Mai from 1971-2000 (30 years)	9
2.4 Relative humidity (%) of Chiang Mai from 1971-2000 (30 years)	9
2.5 Rainfall (mm) of Chiang Mai from 1971-2000 (30 years)	10
2.6 Trophic relationships among figs and fig wasps, Agaonid subfamilies include pollinators, gallers, and parasitoids	23
2.7 <i>Wiebesia partita</i>	24
2.8 a. Ventral view of the female head of <i>Kradibia ohuensis</i> showing mandibular appendage with six lamellae (scale = 0.1 mm), b. Pollen pocket of <i>Ceratosolen kaironkensis</i> containing <i>Ficus microdictya</i> pollen grains	24
2.9 a. <i>Ceratosolen indigenus</i> ; male head with pronotum, b. <i>C. vissali</i> ; male head with pronotum, c. <i>Kradibia wassae</i> ; female head, d. <i>Blastophaga vidua</i> ; male head and e. <i>B. psense</i> ; male head	25
2.10 <i>Ceratosolen dentifer</i> Wiebes, female (left)-pollen pocket in the mesosternum of the thorax and male (right)-with the large hirsute hind legs	26

## LIST OF FIGURES (CONTINUED)

Figure	Page
2.11 Development phase of monoecious and dioecious figs	28
2.12 The pattern of hemi-epiphytic in subgenus <i>Urostigma</i>	31
2.13 Variation on size, texture and shape of fig leaves	32
2.14 Top view and longitudinal section of various types of ostiole and ostiolar bracts	35
2.15 Longitudinal fig sycone	36
2.16 Staminate flower (perianth removed)	37
2.17 Female flower; surface and lateral view	39
2.18 Pistillate flowers	40
2.19 Variation of fruits (achenes) and seeds in <i>Ficus spp.</i>	41
2.20 <i>Ceratosolen arabicus</i> Mayr and its host, <i>Ficus sycomorus</i> during oviposition and pollination	44
2.21 The evolution pattern of oviposition in dioecy and monoecy fig tree	50
2.22 A molecular phylogeny of <i>Ficus</i>	52
3.1 Studies site of <i>Ficus</i> and fig wasps, Chiang Mai, Thailand	58
3.2 The species study of dioecious fig, <i>F. montana</i> in glasshouse	62
3.3 The species study of dioecious fig, <i>F. montana</i> in nature	62
3.4 <i>F. montana</i> , the syconium female fig and male fig	62

## LIST OF FIGURES (CONTINUED)

Figure	Page
3.5 <i>F. racemosa</i> L.	63
4.1 Characters of Chalcidoidae; Antenna	70
4.2 Characters of Chalcidoidae; Head	70
4.3 Characters of Chalcidoidae; Fore wing	71
4.4 Characters of Chalcidoidae; Thorax -dorsal view	71
4.5 Characters of Chalcidoidae; Thorax -side view	72
4.6 Characters of Chalcidoidae; Gaster - dorsal view	72
4.7 Female Agaoninae pollinator; <i>Pleistodontes</i> sp.	73
4.8 Illustration of male and female pollinators in <i>Blastophaga</i>	73
4.9 <i>Ficus altissima</i> Bl.	94
4.10 <i>Ficus benjamina</i> L.	95
4.11 <i>Ficus curtipes</i> Corner	96
4.12 <i>Ficus drupacea</i> Thunb.	97
4.13 <i>Ficus elastica</i> Roxb.	98
4.14 <i>Ficus lacor</i> Buch. Ham.	99
4.15 <i>Ficus maclellandii</i> King	100
4.16 <i>Ficus microcarpa</i> L. f.	101
4.17 <i>Ficus religiosa</i> L.	102
4.18 <i>Ficus rumphii</i> Bl.	103

## LIST OF FIGURES (CONTINUED)

Figure	Page
4.19 <i>Ficus superba</i> var. <i>japonica</i> Miq.	104
4.20 <i>Ficus callosa</i> Willd.	105
4.21 <i>Ficus racemosa</i> L.	106
4.22 <i>Ficus auriculata</i> Lour.	107
4.23 <i>Ficus fistulosa</i> Reinw. ex Bl. (red flower)	108
4.24 <i>Ficus fistulosa</i> Reinw. ex Bl. (white flower)	109
4.25 <i>Ficus hispida</i> L. f. var. <i>hispida</i>	110
4.26 <i>Ficus oligodon</i> Miq.	111
4.27 <i>Ficus semicordata</i> Buch.-Ham. ex Sm.	112
4.28 <i>Ficus squamosa</i> Roxb.	113
4.29 <i>Ficus variegata</i> Blume	114
4.30 <i>Ficus ischnopoda</i> Miq.	115
4.31 <i>Ficus hirta</i> Vahl.	116
4.32 <i>Ficus anserina</i> Corner	117
4.33 <i>Ficus pumila</i> L.	118
4.34 <i>Ficus anastomosans</i> Berg	119
4.35 <i>Ficus subincisa</i> Buch.-Ham. ex Sm.	120
4.36 Some figs in subgenus <i>Urostigma</i>	126
4.37 Some figs in subgenus <i>Urostigma</i> and subgenus <i>Pharmacosycea</i>	127

## LIST OF FIGURES (CONTINUED)

Figure	Page
4.38 Some figs in subgenus <i>Sycomorus</i>	128
4.39 Some figs in subgenus <i>Ficus</i> and subgenus <i>Synoecia</i>	129
4.40 Some figs in subgenus <i>Sycomorus</i> and subgenus <i>Sycomorus</i>	130
4.41 The variation in fig ostiolar bracts	131
4.42 Some fig wasps of fig specimens	132
4.43 Some female non pollinator wasps of fig specimens	133
4.44 The illustrations of some fig wasps under SEM	134
5.1 <i>Ficus montana</i> Burm. f.	139
5.2 The female entering wasp	140
5.3 The cumulative numbers of <i>Ficus montana</i> male figs aborting after entry by single pollen-free	144
5.4 The dissection of abortion <i>F. montana</i> figs	145
5.5 Dissection of male fig	146
5.6 Fig with oviposition experiment	147
5.7 Cumulative abortions amongst <i>Ficus montana</i> male figs after entry by single foundress with and without intact ovipositors	148
5.8 Fig without oviposition	148
5.9 Studies species; <i>Ficus racemosa</i> L.	155
5.10 Temperatures (C°) of Chiang Mai from September 2006-September 2007	157

## LIST OF FIGURES (CONTINUED)

Figure	Page
5.11 Relative humidity of Chiang Mai from September 2006-September 2007	158
5.12 Rainfall (mm) of Chiang Mai from September 2006-September 2007	158
5.13 Crop duration of 5 fig trees, <i>F. racemosa</i> between the dry and the rainy seasons	160
5.14 Style length measuring of female flower fig	161
5.15 Mean of style length (mm) in the dry and rainy seasons	162
5.16 The number of seeds in each sample tree, <i>F. racemosa</i>	162
5.17 Sequences of emerging in the fig, <i>F. racemosa</i>	163
5.18 Oviposition of <i>Apocrypta</i> sp. from out side of the fig, and gall making by the female non-pollinators	164
5.19 Number of female non-pollinator offspring in each crop from September 2006-September 2007	164
