## ACKNOWLEDGEMENT

First and foremost thanks are due to my advisor, Associate Professor Dr. Kabkaew L. Sukontason, without whose guidance and encouragement this thesis would not be what it is today. Her kindness, guidance, stimulating suggestions and encouragement helped me in all aspects of my research and provided me with the opportunity to complete this thesis.

I also wish to express my sincere appreciation and gratitude to my co-advisors, Associate Professor Dr. Kom Sukontason and Associate Professor Dr. Udom Chaithong, Department of Parasitology, Faculty of Medicine, Chiang Mai University, Professor Jimmy K. Olson, Department of Entomology, Texas A&M University, USA, and Dr. Hiromu Kurahashi, Department of Entomology, National Institute of Infectious Disease, Japan for their kindness, valuable guidance, meaningful criticism and help during my doctoral research.

In addition I wish to thank Assistant Professor Dr. Urai Chaisri, Department of Tropical Pathology, Faculty of Tropical Medicine, Mahidol University for her advice on interpreting the transmission electron microscopy results and for her willingness to discuss ideas on the TEM images.

I would like to thank Professor Wej Choochote and Associate Professor Dr. Atchariya Jitpakdi, Department of Parasitology, Faculty of Medicine, Chiang Mai University for serving as my internal examiners. I also thank Dr. Wannapa Suwonkerd, Office of Vector Borne Disease Control Region 2, Department of Communicable Disease Control, Ministry of Public Health, Chiang Mai, for serving as my external examiner and kindly being my comprehensive evaluator.

I would like to acknowledge Mr. Somsak Piangjai and staff of the Department of Parasitology, Faculty of Medicine, Chiang Mai University who helped with their valuable guidance and constant encouragement throughout my studies. I am also grateful to Mrs. Budsabong Kuntalue, Electron Microscopy Research and Service Centre, Faculty of Science, Chiang Mai University for assistance in the electron microscopic studies.

I want to acknowledge my fellowship from the Royal Golden Jubilee Ph.D. Program (Grant No. PHD/0113/2547) and the Ministry Staff Development Project of the Ministry of University Affairs, College of Medicine and Public Health, Ubon Rajathanee University, Thailand for financially supporting my graduate studies at Chiang Mai University.

I am especially grateful to Miss Michelle R Sanford for her kindness, meaningful suggestions, and assistance in revising my manuscripts. I also thank my best friends, Dr. Noppawan Bunchu, Dr. Sirisuda Siriwananarungsee, Miss Ratchadawan Ngoen-klan, Mr. Kittikhun Moophayak, Dr. Damrongpan Thongwat and my other friends in the Department of Parasitology, Chiang Mai University, for helping me get through the difficult times, and for all the emotional support, camaraderie, entertainment, and care they provided.

Lastly, and most importantly, I wish to thank beloved parents and family. They raised me, supported me, taught me, and loved me. To them I dedicate this thesis.

Tarinee Chaiwong
