ACKNOWLEDGEMENT	iii
ENGLISH ABSTRACT	iv
THAI ABSTRACT	vi
LIST OF TABLES	xi
LIST OF FIGURES	xii
ABBREVIATIONS	xiv
CHAPTER 1 INTRODUCTION	
Peptic ulcer disease	1
The pathophysiology of peptic ulcer disease	1
Aggressive factors	1
Defensive factors	3
Physiological and pharmacological regulation of gastric secretion	5
Drug treatment of peptic ulcer	6
Free radicals	8
Oxidative stress	8
Lipid peroxidation	9
Roles of free radicals in the gastric ulcer	11
Roles of free radicals in the hepatic damage	11
Antioxidant in natural plants	13
Seaweeds with anti-gastric ulcer, hepatoprotective and antioxidant activities	13
Background of <i>Caulerpa racemosa</i> var. <i>cylindracea</i>	14
Purposes of the study	17

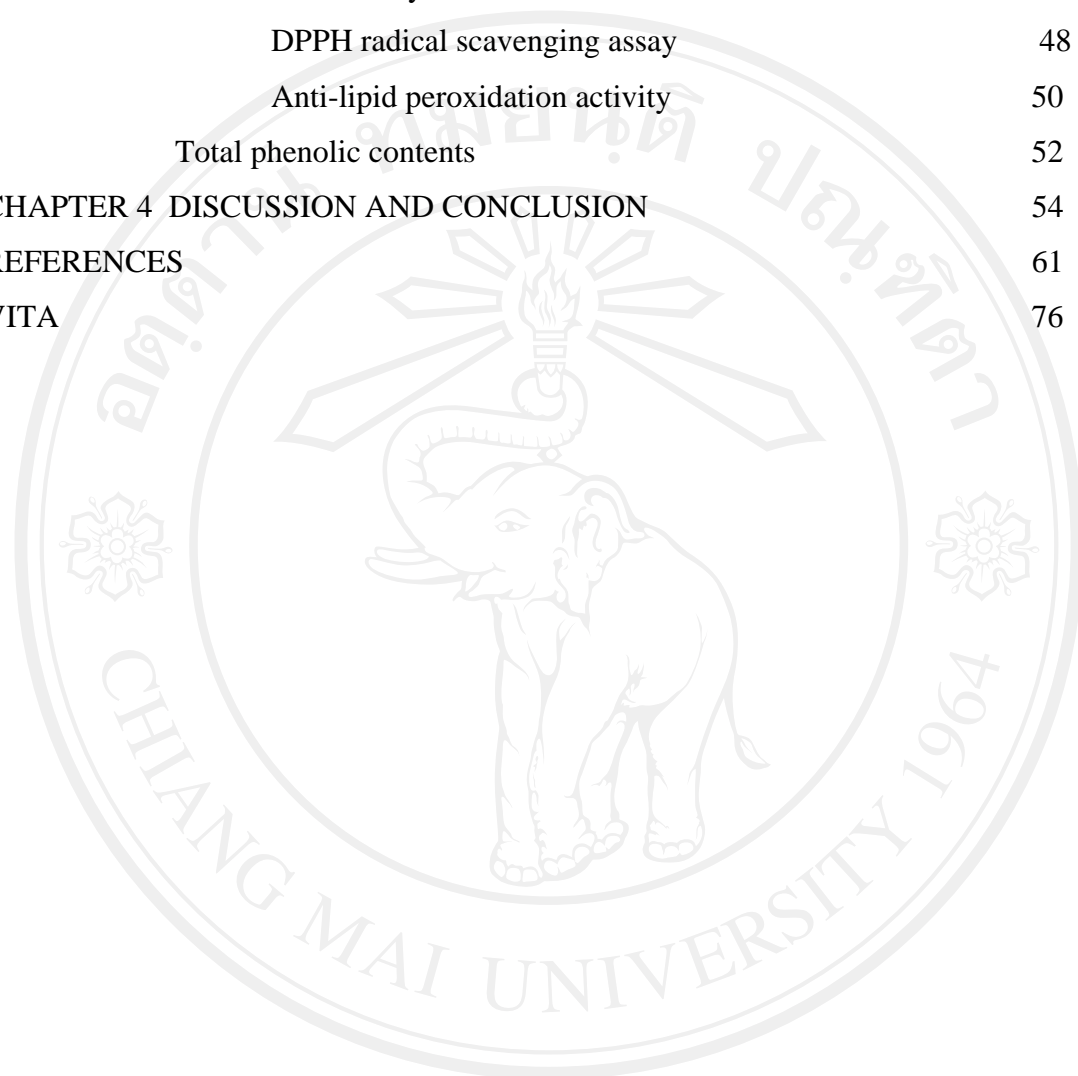

## CHAPTER 2 MATERIALS AND METHODS

Preparation of an aqueous extract of <i>Caulerpa racemosa</i> var. <i>cylindracea</i>	18
Experimental animals	18
Experimental protocols	19
Anti-gastric ulcer activity	19
Restraint water immersion stress-induced gastric ulcers	19
HCl/Ethanol-induced gastric ulcers	19
Indomethacin-induced gastric ulcers	20
Evaluation of gastric ulcers	20
Hepatoprotective activity	24
Collection of blood samples	25
Histopathologic examination of livers	25
Antioxidant activity	27
1, 1-Diphenyl-2-picrylhydrazyl (DPPH) assay	27
Anti-lipid peroxidation activity	28
Total phenolic contents	30
Statistical analysis	30
Drugs and chemicals	31

## CHAPTER 3 RESULTS

Anti-gastric ulcer activity	32
Restraint water immersion stress-induced gastric ulcer in rats	32
HCl/Ethanol-induced gastric ulcers in rats	35
Indomethacin-induced gastric ulcers in rats	38
Comparison of anti-gastric activity of the AqCR in 3 models of gastric ulceration	41
Hepatoprotective activity of the aqueous extract of <i>C. racemosa</i> (AqCR)	42
Levels of ALT and AST enzymes	42

Histopathologic examination of livers	44
Antioxidant activity	48
DPPH radical scavenging assay	48
Anti-lipid peroxidation activity	50
Total phenolic contents	52
CHAPTER 4 DISCUSSION AND CONCLUSION	54
REFERENCES	61
VITA	76

**TABLE OF TABLES**

<b>TABLE</b>		<b>PAGE</b>
1.	Effect of the aqueous extract of <i>C. racemosa</i> (AqCR) on restraint water immersion stress-induced gastric ulcers in rats	34
2.	Effect of the aqueous extract of <i>C. racemosa</i> (AqCR) on HCl/Ethanol-induced gastric ulcers in rats	37
3.	Effect of the aqueous extract of <i>C. racemosa</i> (AqCR) on indomethacin-induced gastric ulcers in rats	40
4.	Effect of the aqueous extract of <i>C. racemosa</i> (AqCR) on serum ALT and AST in rats with CCl <sub>4</sub> -induced hepatic damage	43
5.	Hepatoprotective activity of the aqueous extract of <i>C. racemosa</i> (AqCR) against CCl <sub>4</sub> -induced hepatic damage in rats: histopathological findings	45

## LIST OF FIGURES

FIGURE	PAGE
1. Physiological and pharmacological regulation of gastric secretions: the basis for therapy of peptic ulcer disease	5
2. Basic reaction sequence of lipid peroxidation and final products	10
3. Biotransformation of carbon tetrachloride	12
4. Morphology of the invasive <i>Caulerpa recemosa</i> showed stolon, rhizoids, fronds and ramuli	15
5. The ramuli of <i>Caulerpa recemosa</i>	15
6. Diagram illustrated the protocol of anti-gastric ulcer test: restraint water immersion stress-induced gastric ulcers in rats	21
7. Diagram illustrated the protocol of anti-gastric ulcer test: HCl/EtOH- induced gastric ulcer in rat experiment	22
8. Diagram illustrated the protocol of anti-gastric ulcer test indomethacin-induced gastric ulcer in rat experiment	23
9. Diagram illustrated the protocol of the test for hepatoprotective activity	26
10. Diagram illustrated the producedure of anti-lipid peroxidation activity	29
11. Gastric ulcers induced in rats by the restraint water immersion stress	33
12. Gastric ulcers induced in rats by HCl/EtOH	36
13. Gastric ulcers induced in rats by indomethacin	39
14. Anti-gastric ulcer activity (% inhibition of gastric ulcer formation) of the AqCR at the dose of 100 mg/kg in different gastric ulceration models	41
15. Histopathological sections of the rat liver (Hematoxylin & Eosin staining) Magnification, (400X): Normal, 500 mg/kg AqCR for day 7	46

16. Histopathological sections of the rat liver (Hematoxylin & Eosin staining) 47  
Magnification, (400X): Normal, the pretreatments groups with CCl<sub>4</sub>-induced hepatic damage
17. Concentration-response (DPPH radical-scavenging activity) curves 49  
of the aqueous extract of *C. racemosa* (AqCR) and gallic acid
18. Concentration-response (anti-lipid peroxidation effect) curves 51  
of the aqueous extract of *C. racemosa* (AqCR) and trolox
19. Concentration-response (absorbance at 765 nm) curves 53  
of the aqueous extract of *C. racemosa* (AqCR) and gallic acid

**ABBREVIATIONS**

g	=	gram
h	=	hour
i.p.	=	intraperitoneal
IU/L	=	international unit per liter
mg/kg	=	milligram per kilogram body weight
min	=	minute
ml	=	milliliter
ml/kg	=	milliliter per kilogram body weight
mm	=	millimeter
mM	=	millimolar
nm	=	nanometer
N	=	normality
p.o.	=	per oral
rpm	=	round per minute
s.c.	=	subcutaneous
°C	=	degree Celsius
µg/kg	=	microgram per kilogram body weight
