ACKNOWLEDGEMENT

I would like to thank Associate Professor Nipon Chattipakorn, M.D., Ph.D., my thesis advisor and director of Cardiac Electrophysiology Research and Training (CERT) center, for giving me the great opportunity to do this research. I am highly indebted to his precious instructions, boundless knowledge and kind attention. It was certainly a great pleasure to learn and work with him during my research project.

I would like to express my thankfulness to Narissara Lailerd, Ph.D., my co-adviser, who gave me the excellent advices and inspiring encouragement which were highly helpful for me. I am also highly thankful to Assistant Professor Roongsiri Chotpadiwetkul, PhD. and Miss Petnoi Petsoponsakul for their excellent assistances in the laboratorial technique throughout this thesis.

I would also like to thank Associate Professor Orawan Wongmekiat, Ph.D., my general advisor, and all members in the Department of Physiology, Faculty of Medicine, Chiang Mai University, for their helpful advices, instructions and kindness.

I am also very grateful to all members of the supervisory graduate committee for their valuable suggestion of this thesis.

Thanks are extended to all staff at CERT center for their kind assistance, which facilitated me to carry out my study successfully.

Finally, I would like to express my extreme gratitude to my family for giving and fulfilling everything throughout my life.
