	<b>Page</b>
Acknowledgements	iii
Abstract (Thai)	iv
Abstract (English)	vii
List of Tables	xv
List of Figures	xvii
<b>Chapter 1</b>	
<b>INTRODUCTION</b>	1
1.1 Introduction	1
1.2 Research objectives	3
1.3 Usefulness of the research	3
<b>Chapter 2</b>	
<b>LITERATURE REVIEW</b>	4
2.1 Solid wastes	4
2.1.1 Type of solid wastes	4
2.1.2 Impact of the solid wastes	5
2.2 Composting	6
2.2.1 Composting process	6
2.2.2 Operational parameters for composting process	9
2.3 Bio-degrading microorganisms	20
2.4 Inoculum	28
<b>Chapter 3</b>	
<b>MATERIAL AND METHOD</b>	31
3.1 Chemical reagents and equipments	31
3.1.1 Chemical reagents	31
3.1.2 Equipments	35
3.2 Experimental methods	37

3.2.1	Collection of samples	37
3.2.2	Selection of microorganisms capable of cellulose-, amylase-, protease- and lipase activity	37
3.2.3	Enzymes assays	38
3.2.3.1	Cellulase assay	39
3.2.3.2	Amylase assay	40
3.2.3.3	Protease assay	41
3.2.3.4	Lipase assay	42
3.2.4	Identification of effective microorganisms	42
3.2.4.1	Morphological and biochemical characteristics of bacteria isolates GB 12, LPC 2, LHE 3 and BS 1	43
3.2.4.2	Morphological characteristics of fungal isolates LHE 12 and LHE 10	45
3.2.4.3	Morphological characteristics of actinomycete isolate LPA 1	46
3.2.4.4	Identification by DNA sequencing for bacteria and actinomycetes using 16S rDNA sequence determination	46
3.2.4.5	Identification by DNA sequencing for fungi using ITS1-5.8S rDNA-ITS2 sequence determination	49
3.2.5	Compost inoculum development for composting	50
3.2.6	Assessment of microbial amount of compost inoculum for composting	52
3.2.7	Composting process	52
3.2.7.1	Laboratory experiment	53
3.2.7.2	Field experiment	53
3.2.8	Analytical methods	54
3.2.8.1	Microbiological analysis	54
3.2.8.2	Moisture content	55

	3.2.8.3 pH	56
	3.2.8.4 Electrical conductivity	56
	3.2.8.5 Total organic carbon	56
	3.2.8.6 Total nitrogen	57
	3.2.8.7 Total phosphorus	58
	3.2.8.8 Total potassium	59
	3.2.8.9 Total calcium and magnesium	60
	3.2.8.10 Germination index	62
<b>Chapter 4</b>	<b>RESULTS</b>	<b>63</b>
	4.1 Isolation and selection of effective cellulose-, Amylase-, protease- and lipase-producing Microorganisms	63
	4.2 Enzyme activity	65
	4.3 Identification of effective microorganisms	67
	4.3.1 Morphological and biochemical characteristics of bacterial isolates GB 12, LPC 2, LHE 3 and BS 1	67
	4.3.2 Morphological characteristics of fungal isolates of LHE 12 and LHE 10	67
	4.3.3 Morphological characteristics of actinomycete isolate LPA 15	68
	4.3.4 Identification of bacteria, actinomycetes and fungi by DNA sequencing	68
	4.4 Compost inoculum development for composting in laboratory and field experiment	71
	4.4.1 Growth of thermophilic bacteria	71
	4.4.2 Growth of thermophilic fungi	73
	4.4.3 Growth of thermophilic actinomycetes	75
	4.4.4 Growth of cellulose-degrading thermophilies	76
	4.4.5 Changes of pH	78
	4.4.6 Changes of C/N ratio	79

4.5 Composting process in laboratory experiment	80
4.5.1 Growth of thermophilic bacteria	80
4.5.2 Growth of thermophilic fungi	82
4.5.3 Growth of thermophilic actinomycetes	84
4.5.4 Growth of cellulose-degrading thermophiles	85
4.5.5 Change of pH	87
4.5.6 Change of C/N ratio	88
4.6 Composting process in field experiment	89
4.6.1 Growth of thermophilic bacteria	89
4.6.2 Growth of mesophilic bacteria	91
4.6.3 Growth of thermophilic fungi growth	93
4.6.4 Growth of mesophilic fungi	94
4.6.5 Growth of thermophilic actinomycetes	96
4.6.6 Growth of mesophilis actinomycetes	97
4.6.7 Growth of cellulose-degrading thermophilies	99
4.6.8 Growth of cellulose-degrading mesophilies	100
4.6.9 Cellulase activity	102
4.6.10 Temperature	103
4.6.11 pH	105
4.6.12 Moisture content	107
4.7 Adequacy of the composting process in field experiment	108

## Chapter 5 DISCUSSION 110

5.1 Isolation of effective microorganisms producing potential cellulolytic, amylolytic, proteolytic and lipolytic enzymes	110
5.1.1 Cellulose-degrading microorganisms	110
5.1.2 Starch-degrading microorganisms	112
5.1.3 Protein-degrading microorganisms	113
5.1.4 Lipase-degrading microorganisms	114
5.2 Compost inoculum development	115

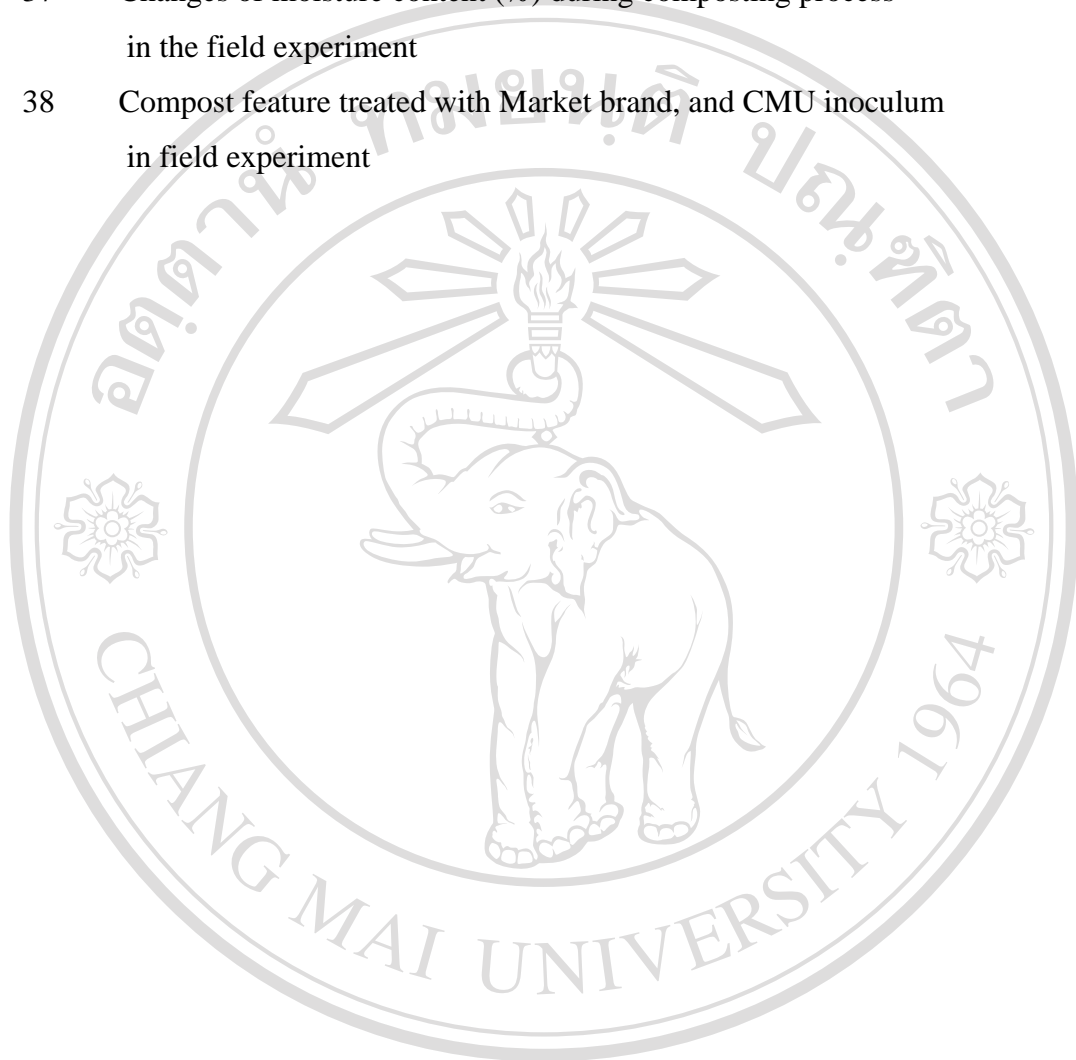

5.2.1 Proper concentration of effective microorganisms for decomposing vegetative matter	115
5.3 Composting process	116
5.3.1 Decomposing rice straw in laboratory experiment	116
5.3.2 Composting in field experiment	117
<b>Chapter 6 CONCLUSION</b>	123
<b>REFERENCES</b>	127
<b>APPENDIX A</b> Standard curve of substrate for Enzyme assay	149
<b>APPENDIX B</b> DNA sequencing	156
<b>APPENDIX C</b> Pictures	179
<b>CURRICULUM VITAE</b>	189

## LIST OF TABLES

<b>Table</b>		<b>Page</b>
1	Microbial population changes during composting	12
2	Species diversity of the dominant microorganisms isolated during different composting phases	13
3	Nitrogen content and C/N of various wastes and residues	16
4	Percentage of cytoplasmic and cell wall components in plants	22
5	Representative cellulase-producing microorganisms	24
6	Some microbial genera have ability in utilizing starch	26
7	Concentrations of effective microorganisms in compost activators	52
8	Physicochemical and biological parameters used for analyses of samples	54
9	Number of microorganisms producing cellulose, amylase, protease and lipase from different sources	64
10	The diameter of hydrolytic zone of cellulase-, amylase-, protease- and lipase- producing microorganisms on corresponding solid media	65
11	Enzyme activity of isolated microorganisms	66
12	Characterization of bacterial isolates GB 12, LPC 2, LHE and BS 1	67
13	Identification of isolates GB 12, LPC 2, BS 1, LHE 3, LPA 15, LHE 12 and LHE 10 by using DNA sequence	69
14	Changes in the thermophilic bacteria biomass ( $\log_{10}$ CFU $g^{-1}$ ) during decomposition of rice straw	72
15	Changes in the thermophilic fungi biomass ( $\log_{10}$ CFU $g^{-1}$ ) during decomposition of rice straw	74
16	Changes in the thermophilic actinomycetes biomass ( $\log_{10}$ CFU $g^{-1}$ ) during decomposition of rice straw	75
17	Changes in the cellulose-degrading thermophiles biomass	

	(log <sub>10</sub> CFU g <sup>-1</sup> ) during decomposition of rice straw	77
18	Changes of the pH during decomposition of rice straw	78
19	Changes in the C/N ratio during decomposition of rice straw	80
20	Changes in thermophilic bacteria biomass (log <sub>10</sub> CFU g <sup>-1</sup> ) during composting in laboratory	81
21	Changes in thermophilic fungi biomass (log <sub>10</sub> CFU g <sup>-1</sup> ) during composting in laboratory	83
22	Changes in thermophilic actinomycetes biomass (log <sub>10</sub> CFU g <sup>-1</sup> ) during composting in laboratory	84
23	Changes in thermophilic bacteria biomass (log <sub>10</sub> CFU g <sup>-1</sup> ) during composting in laboratory	86
24	Changes of pH during composting in laboratory	87
25	Changes of C/N ratio during composting in laboratory	89
26	Changes of thermophilic bacteria biomass (log <sub>10</sub> CFU g <sup>-1</sup> ) during composting process in the field experiment	90
27	Changes of mesophilic bacteria biomass (log <sub>10</sub> CFU g <sup>-1</sup> ) during composting process in the field experiment	92
28	Changes of thermophilic fungi biomass (log <sub>10</sub> CFU g <sup>-1</sup> ) during composting process in the field experiment	93
29	Changes of mesophilic fungi biomass (log <sub>10</sub> CFU g <sup>-1</sup> ) during composting process in the field experiment	95
30	Changes of thermophilic actinomycetes biomass (log <sub>10</sub> CFU g <sup>-1</sup> ) during composting process in the field experiment	96
31	Changes of mesophilic actinomycetes biomass (log <sub>10</sub> CFU g <sup>-1</sup> ) during composting process in the field experiment	98
32	Changes of cellulose-degrading thermophiles biomass (log <sub>10</sub> CFU g <sup>-1</sup> ) during composting process in the field experiment	99
33	Changes of cellulose-degrading mesophiles biomass (log <sub>10</sub> CFU g <sup>-1</sup> ) during composting process in the field experiment	101
34	Changes of cellulase activity (Unit mL <sup>-1</sup> ) during composting process in the field experiment	102
35	Changes of temperature (°C) during composting process	

	in the field experiment	104
36	Changes of pH during composting process in the field experiment	106
37	Changes of moisture content (%) during composting process in the field experiment	107
38	Compost feature treated with Market brand, and CMU inoculum in field experiment	109

## LIST OF FIGURES

<b>Figure</b>	<b>Page</b>
1 Inputs and outputs of the composting process	6
2 Patterns of temperature and microbial growth in compost pile	7
3 The effects of turning on compost temperature	10
4 DNA size of isolates GB 12, LPC 2, BS 1, LHE 3 and LPA 15	70
5 DNA size of isolates LHE 10 and LHE 12	70
6 Changes of thermophilic bacteria growth during decomposition of rice straw	72
7 Changes of thermophilic fungi growth during decomposition of rice straw	74
8 Changes of thermophilic actinomycetes growth during decomposition of rice straw	76
9 Changes of cellulose-degrading thermophiles growth during decomposition of rice straw	77
10 Changes of pH during decomposition of rice straw	79
11 Changes of C/N ratio during decomposition of rice straw	80
12 Changes of thermophilic bacteria growth during composting rice straw in laboratory experiment	82
13 Changes of thermophilic fungi growth during composting in laboratory	83
14 Changes of thermophilic actinomycetes growth during composting in laboratory	85
15 Changes of cellulose-degrading thermophiles growth during composting in laboratory	86
16 Changes of pH during composting in laboratory	88
17 Changes of C/N ratio during decomposting in laboratory	89
18 Changes of thermophilic bacteria growth during composting	

	process in the field experiment	91
19	Changes of mesophilic bacteria growth during composting process in the field experiment	92
20	Changes of thermophilic fungi growth during composting process process in the field experiment	94
21	Changes of mesophilic fungi growth during composting process process in the field experiment	95
22	Changes of thermophilic actinomycetes growth during composting process in the field experiment	97
23	Changes of mesophilic actinomycetes growth during composting process in the field experiment	98
24	Changes of cellulose-degrading thermophiles during composting process in the field experiment	100
25	Changes of cellulose-degrading mesophiles during composting process in the field experiment	101
26	Changes of cellulase activity during composting process in the field experiment	103
27	Changes of temperature during composting process in the field experiment	105
28	Changes of pH during composting process in the field experiment	106
29	Changes of moisture content during composting process in the field experiment	108
