

## TABLE OF CONTENTS

	Page
ACKNOWLEDGEMENTS	iii
ABSTRACT IN ENGLISH	iv
ABSTRACT IN THAI	vi
LIST OF TABLES	xiii
LIST OF FIGURES	xiv
ABBREVIATION AND SYMBOLS	xvi
CHAPTER 1 INTRODUCTION	1
CHAPTER 2 LITERATURE REVIEW	4
2.1 Phenol	4
2.2 Phenol chemical and physical properties	5
2.3 Sources of phenol	7
2.3.1 Natural sources	7
2.3.2 Man-made sources	8
2.3.3 Endogenous sources	8
2.4 Release of phenol into the environment	10
2.4.1 Air	10
2.4.2 Water	11
2.4.3 Soil	13

## TABLE OF CONTENTS (CONTINUED)

	Page
2.5 Hazards of phenol	13
2.6 Process for treating phenol	15
2.6.1 Chemical methods	15
2.6.2 Physical methods	16
2.6.3 Biological methods	16
2.7 Microbial degradation	17
Phenol-degrading microorganisms	19
2.8 Mechanism of phenol biodegradation	25
2.9 Phenol-degrading <i>Candida tropicalis</i>	27
2.10 Aerobic biodegradation of phenol	29
2.11 Phenol inhibitory levels for phenol degradation by microorganisms	30
2.12 Factor affecting phenol degradation	32
2.12.1 Effect of temperature	32
2.12.2 Effect of pH	32
2.12.3 Effect of secondary carbon source	33
2.12.4 Effect of metal ions	34
2.13 Cells immobilization	35
2.13.1 Immobilization techniques	35
2.13.1.1 Carrier-Binding Method	35

## TABLE OF CONTENTS (CONTINUED)

	<b>Page</b>
2.13.1.2 Cross-Linking Method	36
2.13.1.3 Entrapping Method	36
2.13.2 Advantages and disadvantages	37
2.14 Repeated batch mode	38
<b>CHAPTER 3 MATERIALS AND METHODS</b>	<b>40</b>
3.1 Microorganism	40
3.2 Media	41
3.3 Inoculum preparation	41
3.4 phenol degradation experiments	42
3.4.1 Selection of optimal temperature for microbial growth	42
3.4.2 Effect of physical and nutritional	42
3.4.2.1 Effect of phenol concentration	42
3.4.2.2 Effect of pH level	42
3.4.2.3 Effect of glucose concentration	42
3.4.2.4 Effect of organic acids	42
3.4.2.5 Effect of metal ions	43
3.5 Cell immobilization procedure	43
3.6 Repeated batch degradation of phenol	44

## TABLE OF CONTENTS (CONTINUED)

	<b>Page</b>
3.8 Analytical methods	44
3.8.1 Determination of phenol concentration	44
3.8.2 Determination of cell density	45
3.8.3 Determination of pH level	45
3.8.4 Calculation of average phenol degradation rate	45
<b>CHAPTER 4 RESULTS AND DISCUSSION</b>	<b>46</b>
4.1 The selection of optimal temperature for phenol degradation	46
4.2 The effect of initial phenol concentration	49
4.3 The effect of initial pH	51
4.4 The effect of glucose concentration	53
4.5 The effect of organic acids concentration	56
4.6 The effect of metal ions concentration	57
4.7 Phenol degradation by free and immobilized cells in repeated batch cultures	58
4.8 Degradation kinetics of the repeated batch systems	62
<b>CHAPTER 5 CONCLUSION</b>	<b>65</b>
<b>REFERENCES</b>	<b>67</b>
<b>APPENDIX A MEDIUM AND SOLUTION PREPARATION</b>	<b>93</b>
Appendix A1 A mineral salt agar	93

## TABLE OF CONTENTS (CONTINUED)

	<b>Page</b>
Appendix A2 A mineral salt medium	94
Appendix A3 Yeast malt broth	95
Appendix A4 Stock phenol solution	95
<b>APPENDIX B CHEMICAL ANALYSIS</b>	<b>96</b>
Appendix B Phenol analysis	96
<b>APPENDIX C CALIBRATION GRAPHS</b>	<b>99</b>
Appendix C1 Biomass	99
Appendix C2 Phenol	100
<b>CURRICULUM VITAE</b>	<b>101</b>

## LIST OF TABLES

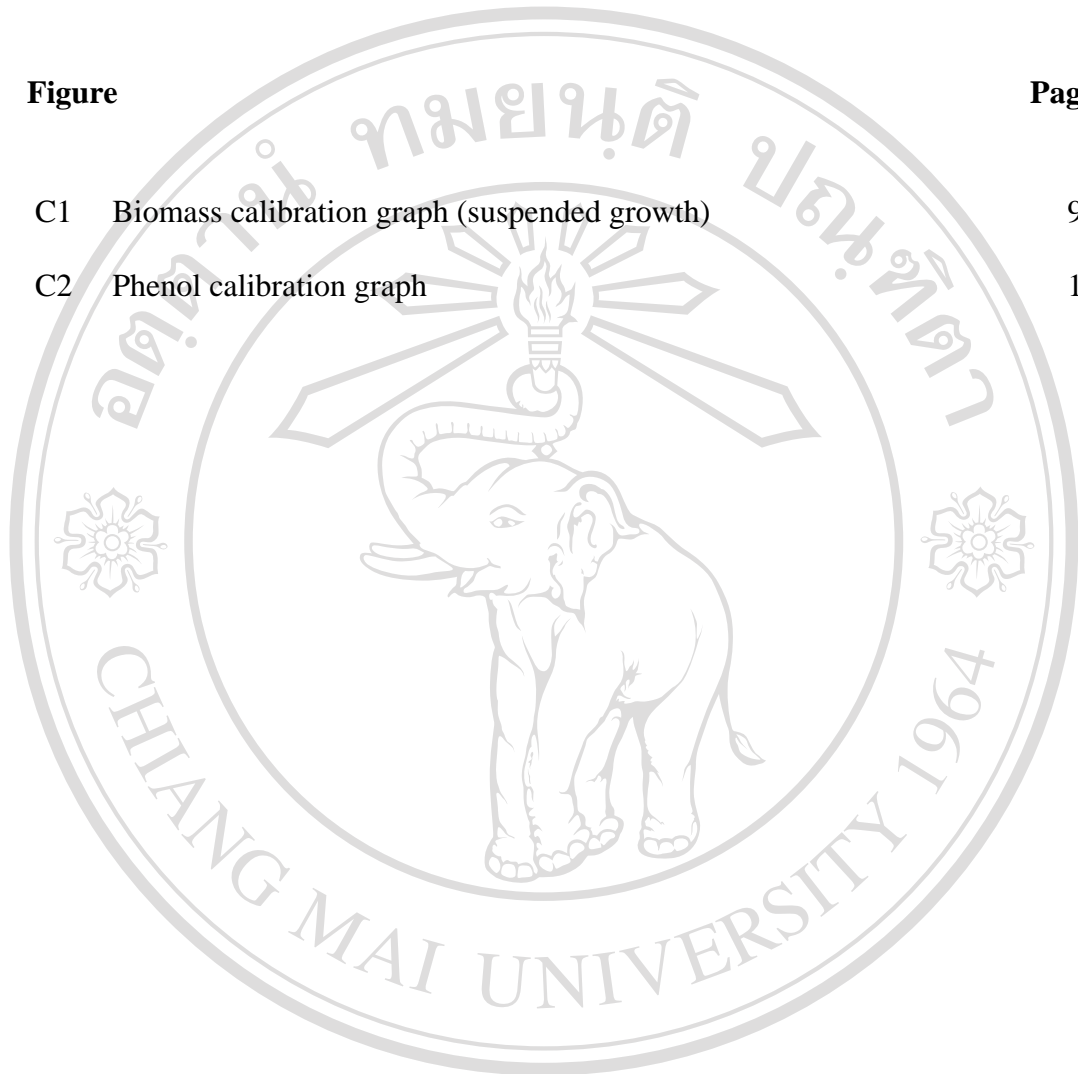

Table	Page
2.1 Physical properties and chemical identity of phenol	6
2.2 Sources of phenols and other related aromatic compounds in wastewater	8
2.3 Typical levels of phenol concentration in wastewater of some selected industries	12
2.4 Phenol-degrading microorganisms	20
2.5 Source of origin of phenol degrading <i>Candida tropicalis</i>	28
2.6 Phenol inhibitory levels for phenol degradation by microorganism	31

## LIST OF FIGURES

Figure	Page
2.1 The main pathways of phenol degradation under aerobic condition	27
3.1 Morphology of <i>C. tropicalis</i> under light microscope	40
4.1 The effect of temperature on phenol degradation by <i>C. tropicalis</i> CMU 10	48
4.2 The effect of initial phenol concentration (mg/l) on phenol degradation by <i>C. tropicalis</i> CMU 10	50
4.3 The effect of pH on phenol degradation by <i>C. tropicalis</i> CMU 10	52
4.4 The effect of glucose concentration on phenol degradation by <i>C. tropicalis</i> CMU 10	55
4.5 The effect of organic acid species on phenol degradation by <i>C. tropicalis</i> CMU 10	56
4.6 The effect of metal ions on phenol degradation by <i>C. tropicalis</i> CMU 10	57
4.7 Degradation of phenol by <i>C. tropicalis</i> CMU 10 in repeated batch cultures with various level of initial phenol concentrations and cell preparation	59
4.8 Adsorption of phenol (1,000 mg/l) on immobilizing agents	60
4.9 Effect of initial phenol concentrations on degradation rate by <i>C. tropicalis</i> CMU 10 in repeated batch cultures for different cells preparation	64

**LIST OF FIGURES (CONTINUED)**

<b>Figure</b>		<b>Page</b>
C1	Biomass calibration graph (suspended growth)	99
C2	Phenol calibration graph	100

## ABBREVIATIONS AND SYMBOLS

°C	degree celcius
cm <sup>3</sup>	cubic centimeter
g	gram
g/l	gram per liter
h	hour
l	litre
min	minute
mg	milligram
mM	millimolar
mg/l	milligram per liter
nm	nanometer
OD	optical density
rpm	revole per minute
μg/kg	microgram per kilogram
w/v	weight by volume
±	deviation
%	percent
