ACKNOWLEDGEMENTS

The author wishes to express her sincere thanks and profound appreciation to her thesis supervisor, Dr. Sukjit Kungwankunakorn, for her kind supervision, guidance and continual encouragement throughout this research work and helping me succeed in writing this thesis.

The author would like to express her gratitude to Associate Professor Dr. Sukanya Wongpornchai, for her support in the rice samples.

The author is grateful to Miss Thanaporn Na-Chiang Mai of the Department of Chemistry of Chiang Mai University for her technical suggestions on AAS and admirable service throughout this work.

The author would like to acknowledge the contribution from the Center for Innovation of Chemistry: Postgraduate Education and Research Program in Chemistry (PERCH-CIC) of the Thai Ministry of University Affairs.

The author wishes to thank for her family-particularly, Anek-Saisunee Saksornchai for their endless love, continual care and hearty encouragement.

Finally, the author would like to thank people whose names are not listed here and those who have one way or another contributed the success of this work.

Eksuree Saksornchai
