ACKNOWLEDGEMENT

I would like to sincerely thank my major advisor, Assoc. Prof. Dr. Sukon Phanichphant for her kindness, valuable guidance, and constant encouragement throughout my research study.

My special thanks go to the examining committees, Dr. Pichai Pirakitikulr and Assoc. Prof. Dr. Udom Sriyotha for their helpful suggestions to make this thesis in a better form.

I would like to thank The Department of Chemistry, Faculty of Science, Chiang Mai University, Thailand for providing me to gain the valuable experiences. The Graduate School, Chiang Mai University, Center of Excellence for Innovation in Chemistry (PERCH-CIC), Thailand for the financial support throughout my study.

I also like to thank all my colleagues of the NRL group at the Nanoscience Research Laboratory, Department of Chemistry, Faculty of Science, Chiang Mai University, and the Electron Microscopy Research and Service center (EMRSc), Chiang Mai University for the facilitation of SEM and TEM.

Last but not least I would like to thank my parent and all my family members for their forever love, care, and support. I would like to give the credit of my success to them.

Thanittha Samerjai
