ACKNOWLEDGEMENTS

First and foremost, I would like to express my profound gratitude and respect to my advisor Assistant Professor Dr. Nakorn Tippayawong, Department of Mechanical Engineering, Faculty of Engineering, Chiang Mai University, Thailand for his invaluable supervision, helpful suggestion and necessary assistance throughout the preparation of my thesis.

My deep gratitude also goes to my co-advisor Assistant Professor Dr. Chatchawan Chaichana for his peer review, priceless comments, suggestion and encouragement. I am also equally grateful to other member of academic advisory committee Dr. Yucho Sadamichi and Dr. Kriengkrai Assawamartbunlue for their suggestions and advice on my thesis.

Special thanks are also extended to Department of Alternative Energy Development and Efficiency, Ministry of Energy, Thailand for financial support and the Energy Planning Department of Myanmar, the Myanmar Engineering Society, the Energy Research and Development Institute in Chiang Mai University and the villagers of Dagoon Daing Village, Twantay Township, Yangon, Myanmar for their support and helpful.

Many thanks are extended to Ministry of Science and Technology, Union of Myanmar for providing me the opportunity to pursue this master's degree. I am very much delighted to pay thanks for the warm and cordial friendship provided by all Mechanical students-juniors, mates as well as seniors from Chiang Mai University, Thailand. Moreover, my sincere thanks are to all academic and administrative staffs of Chiang Mai University for their helps. Many thanks also go to all oversea Myanmar students for sharing joyful moments in Chiang Mai.

Finally, I wish to thanks everyone whose names could not be mentioned individually.

Min Lwin Swe
