ACKNOWLEDGEMENT	iii
ABSTRACT (IN ENGLISH)	v
ABSTRACT (IN THAI)	ix
TABLE OF CONTENTS	xiii
LIST OF TABLES	xvi
LIST OF FIGURES	xvii
ABBREVIATIONS AND SYMBOLS	xx
CHAPTER I INTRODUCTION	1
1. PROBLEMS AND RESEARCH RATIONALE	1
2. LITERATURE REVIEW	4
2.1 Bionomic and medical importance of	
<i>Chrysomya megacephala</i>	4
2.2 General alimentary system of insects	8
2.3 Ultrastructural study on the alimentary organs of	
insects	16
3. PURPOSE OF THIS STUDY	18
4. SIGNIFICANCE OF THE RESEARCH	18

TABLE OF CONTENTS (continued)

	Page
CHAPTER II MATERIALS AND METHODS	19
1. Maintenance of the <i>Chrysomya megacephala</i> colony	19
2. Fly specimens and external morphometric evaluation	21
2.1 Third instar	21
2.2 Adult male and female flies	22
3. Alimentary tract dissection	25
3.1 Larval dissection	25
3.2 Adult dissection	26
4. Light microscopic study (LM)	27
5. Scanning electron microscopy (SEM)	28
6. Transmission electron microscopy (TEM)	28
7. Statistical analysis	29
CHAPTER III RESULTS	30
1. Morphometric evaluation	30
2. Light microscopic observation of the third instar	34
3. Scanning electron microscopic observation of the third instar	36
4. Transmission electron microscopic observation of the third instar	39
5. Light microscopic observation of male	45

TABLE OF CONTENTS (continued)

	Page
6. Scanning electron microscopic observation of male	47
7. Transmission electron microscopic observation of male	50
8. Light microscopic observation of female	61
9. Scanning electron microscopic observation of female	64
10. Transmission electron microscopic observation of female	67
CHAPTER IV DISCUSSION	74
CHAPTER V CONCLUSION	83

LIST OF TABLES

Table		Page
1	Morphometric evaluation of <i>Chrysomya megacephala</i>	32
2	Morphometric analyses of internal organ of <i>Chrysomya megacephala</i>	33

LIST OF FIGURES

Figure		Page
1	Wing veins of the adult fly (Greenberg 1971)	23
2	Flow chart showing summarized experiment design	24
3	Alimentary canal of the third instar <i>Chrysomya megacephala</i>	35
4	SEM micrographs of the third instar <i>Chrysomya megacephala</i> . (A) Esophagus (Es) with longitudinally folded external surface	37
5	SEM micrographs of the third instar <i>Chrysomya megacephala</i> . (A) Ruptured midgut showing epithelium cells (EC) and central peritrophic membrane (P)	38
6	Micrographs of the third instar <i>Chrysomya megacephala</i> . (A) Semi-thin section of the salivary gland showing fairly conical-shaped of epithelial cells, with large nucleus (N)	41
7	Micrographs of the third instar <i>Chrysomya megacephala</i> . (A) Semi-thin section of the midgut showing cuboidal epithelial cells (EC) interspersed with fat body cells (F)	43
8	Alimentary canal of male <i>Chrysomya megacephala</i>	46
9	SEM micrographs of alimentary canal of male <i>Chrysomya megacephala</i> . (A) Salivary glands adjacent to cardia (Ca)	48

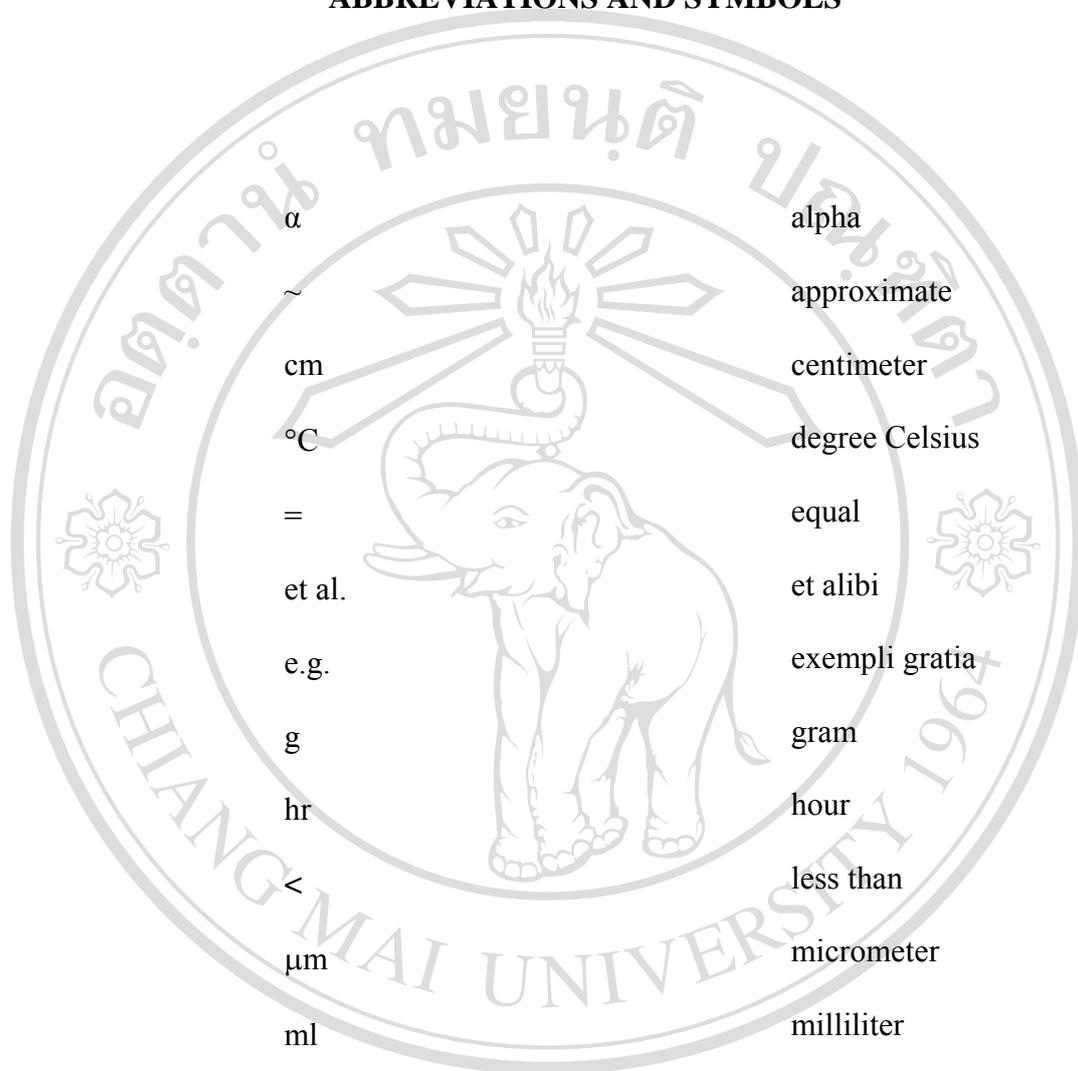

LIST OF FIGURES (continued)

Figure		Page
10	SEM micrographs of alimentary canal of male <i>Chrysomya megacephala</i> . (A) Ileum and colon	49
11	Micrographs of alimentary canal of male <i>Chrysomya megacephala</i> . (A) Thick section of esophagus showing cuticle at the lumen (arrow)	51
12	Micrographs of alimentary canal of male <i>Chrysomya megacephala</i> . (A) Semi-thin cross section of the crop displayed the convoluted cuticle centrally	54
13	Micrographs of alimentary canal of male <i>Chrysomya megacephala</i> . (A) Semi-thin section of midgut showing packed columnar epithelial cells with large nucleus (arrows)	56
14	Micrographs of alimentary canal of male <i>Chrysomya megacephala</i> . (A) Sections of the anterior rectum displayed four rectal pads (arrows)	59
15	Alimentary canal of female <i>Chrysomya megacephala</i>	62
16	Alimentary canal of female <i>Chrysomya megacephala</i> . (A) Foregut showing coiled salivary glands at the apex (white arrow), swollen of gland (white arrowhead) and salivary duct (black arrowhead)	63

LIST OF FIGURES (continued)

Figure		Page
17	SEM micrographs of alimentary canal of female <i>Chrysomya megacephala</i> . (A) Bi-lobed crop connecting to crop duct	65
18	SEM micrographs of alimentary canal of female <i>Chrysomya megacephala</i> . (A) Malpighian tubule	66
19	Micrographs of alimentary canal of female <i>Chrysomya megacephala</i> . (A) Cross-section of esophagus with convoluted tube lined with cuticle (arrow)	68
20	Micrographs of alimentary canal of female <i>Chrysomya megacephala</i> . (A) Sagittal section of anterior midgut displaying epithelial cells containing large nucleus (arrows)	70
21	Micrographs of alimentary canal of female <i>Chrysomya megacephala</i> . (A) Rectal gland showing marginal rectal pad (arrow) and rectal papillae of the opposite side (arrowhead)	72

ABBREVIATIONS AND SYMBOLS

α	alpha
\sim	approximate
cm	centimeter
$^{\circ}\text{C}$	degree Celsius
=	equal
et al.	et alibi
e.g.	exempli gratia
g	gram
hr	hour
<	less than
μm	micrometer
ml	milliliter

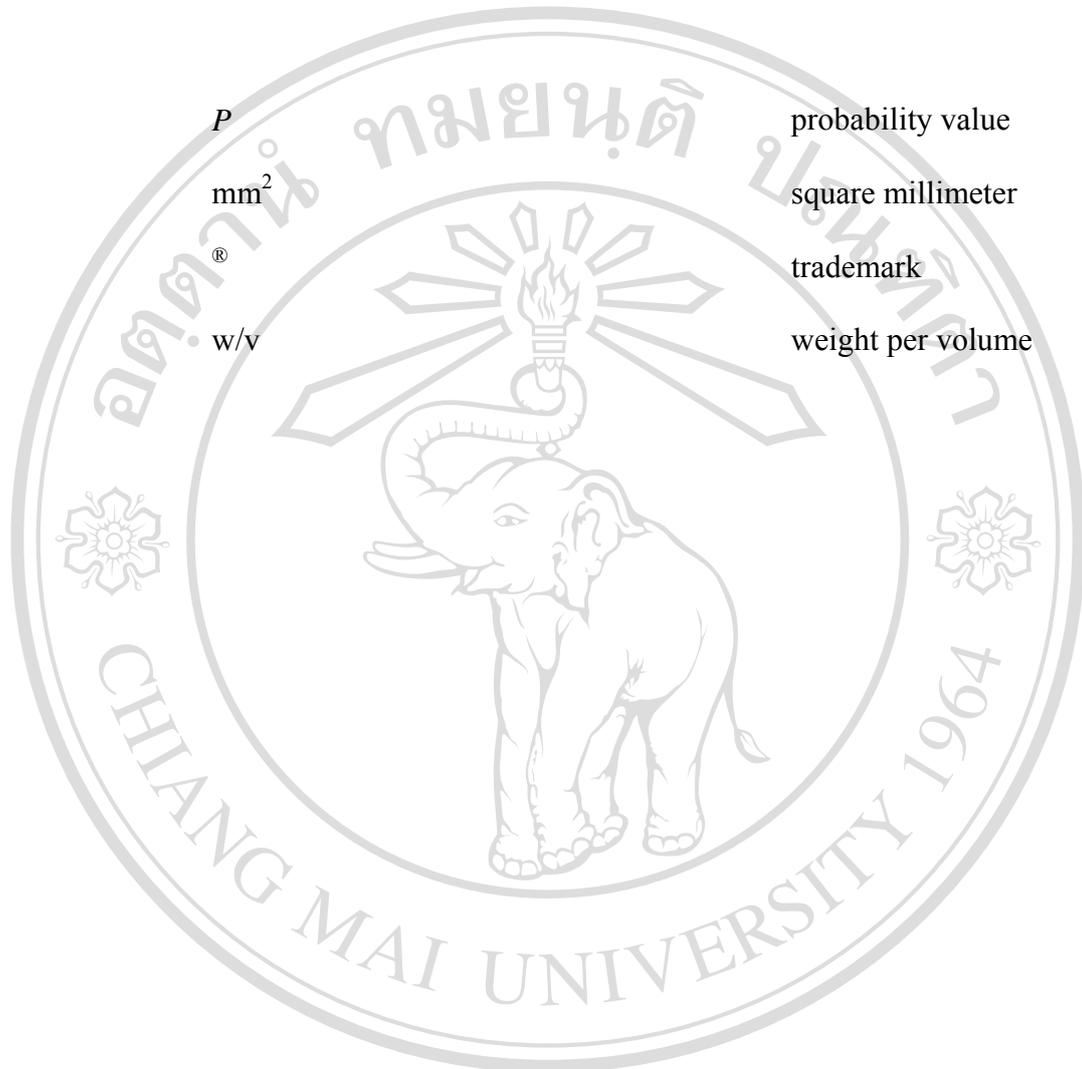

ลิขสิทธิ์มหาวิทยาลัยเชียงใหม่

Copyright © by Chiang Mai University

All rights reserved

mm	millimeter
min	minute
nm	nanometer
No.	number
n	number examined
%	percentage
pH	potential of hydrogen

ABBREVIATIONS AND SYMBOLS (continued)

 P

probability value

 mm^2

square millimeter

®

trademark

w/v

weight per volume
