ACKNOWLEDGEMENTS

The success of this thesis has been attributed to the support and help from his major advisor, Asst. Prof. Dr. Chaiyavat Chaiyasut. I would like to express my gratitude for his supervision, guidance and opportunity. I wish to express my sincere thanks and appreciation to my co-advisor, Assoc. Prof. Dr. Somdet Srichairatanakool, for valuable guidance, advice and assistance in research work.

I would like to gratitude and grateful thanks to my co-advisor, Dr. Narissara Lailerd for kindly recommendation, technical guidance and opportunity to have training in the physiology and animal laboratory. I also many thanks my co-advisor, Assoc. Prof. Dr. Peerasak Lertrakranon for the clinical advice and encouragement throughout my study.

The same gratitude and grateful thanks are extended to the experts, Prof. Emeritus Dr. Maitree Suttajit for the worthy criticism and suggestion, Dr. Gregory Greg Geer and Dr. Chaisiri Augkurawaranon for correction and proof of the language.

I would like to thanks the Faculty of Pharmacy and the Graduate School, Chiang Mai University, for the grant partially support. I also thank the Department of Pharmaceutical Sciences, Faculty of Pharmacy, the Department of Biochemistry, Faculty of Medicine, the Department of physiology, Faculty of Medicine and also Animal Laboratory Unit, Faculty of Medicine, Chiang Mai University, for access to laboratory facilities. Special thanks are given to graduate students for their helpful suggestion and co-operation throughout this work.

Finally, I would like to profound thanks to my family for their understanding, encouragement and support.

Winthana Kusirisin
