ACKNOWLEDGEMENT

The following persons are greatly appreciated, without whose help and advice, this thesis would not have been completed.

First of all, I would like to express my sincere respect and gratitude to my chief advisor, Assoc. Prof. Dr. Ampai Panthong for her excellent guidance, encouragement, valuable advice and generous help in writing this thesis as well as for her strong support of my studies.

I am most grateful to the staff of the Department of Pharmacology, Faculty of Medicine, Chiang Mai University, especially Dr. Parirat Khonsung and Dr. Natthakarn Chiranthanut, my thesis co-advisors, for their advice during doing my research work.

I would like to express special thanks to Mrs. Ratchanee Somwong for her assistance and instruction of laboratory technique.

The Center for Innovation in Chemistry (PERCH-CIC) is greatly appreciated for the scholarship and the financial support for the research work.

I owe special gratitude to Professor Dr. Vichai Reutrakul, Director of PERCH-CIC for the providing the plant extract used in this research.

Finally, I am especially grateful to my family for their support, helpfulness, understanding and encouragement.
