ACKNOWLEDGEMENTS

The complete achievement of this thesis would not be possible without the valuable suggestion and guidance of the supervisory committee, for whom I continuously learn. A sincere appreciation is also extending to all staffs of the Department of Pharmacology for their instruction and their support throughout my graduate study

I am deeply indebted to my supervisor Assoc. Prof. Noppamas Rojanasthien for her valuable guidance on the research plan, data analysis, writing of this thesis, encouragement and kindness throughout the period of this study.

A sincere gratefulness is bestowed to Assoc. Prof. Dr. Chaichan Sangdee for his help and advice in shaping up this thesis. I wish to express my deep appreciation to Assoc. Prof. Dr. Supanimit Teekachunhatean for his comment and support

I am also very grateful to Mr. Boonyium Kumsorn who closely supervises me to understand the HPLC systems and analytical methods. In addition, this thesis cannot be done successfully without the contribution Mrs. Rapheeporn Khatsri on handling of subjects and sample collection.

I would like to thank all volunteers enrolled in this research. I deeply appreciate their participation and compliance throughout the research.

Finally, I also would like to express my honest appreciation to my fellow and other persons who have not been mentioned here for their encouragement, kind assistance and sincere friendship during my entire study.
