ACKNOWLEDGEMENT

This thesis was prepared with the help of many people. With profound gratitude and sincerity, I wish to acknowledge the following persons, without whose help, advice and support, this thesis would not have been completed.

First of all, I would like to express my deepest gratitude and appreciation to my chief advisor, Assoc. Prof. Dr. Ampai Panthong for her excellent instruction, guidance, encouragement, valuable advice and generous help in writing this thesis as well as for her strong support of my studies.

I am greatly indebted to all staffs of the Department of Pharmacology, Faculty of Medicine, Chiang Mai University, especially Dr. Natthakarn Chiranthanut and Dr. Parirat Khonsung, my thesis co-advisors, for their devotion, enthusiastic teaching, assistance and kind advice during carrying out my research work.

A special gratefulness is also extended to Assoc. Prof. Dr. Chaichan Sangdee for improving English language of this thesis and to Mrs. Ratchanee Somwong for her instruction and assistance of laboratory technique.

The Center for Innovation in Chemistry (PERCH-CIC) is greatly appreciated for the scholarship and the financial support for the research work.

I owe special gratitude to Prof. Dr. Vichai Reutrakul, Director of PERCH-CIC for the providing the plant extract used in this research.

I also wish to express my thanks to all my beloved friends for their special support, helpfulness and unforgettable friendship during my educational experience.

And finally, I am sincerely grateful to my family for their love, understanding, moral assistance and encouragement to make this study a reality.

Kanoktip Thammasri
