ACKNOWLEDGEMENTS

I would like to thank Dr. Kamolchai Kotcha, Assoc. Prof. Dr. Narit Sitasuwan, Prof. Dr. Pilai Poonswad, Assoc. Prof. Dr. Araya Jatisatienr, and Assist. Prof. Dr. Kanokporn Saenphet for their kindness in giving me their precious time in evaluating and making suggestions on this dissertation. Assoc. Prof. Dr. Narit Sitasuwan, who has been giving me a lot of advice, has motivated me throughout this study.

I am grateful to the Office of the Higher Education Commission, and the Faculty of Science, Mahasarakham University for full a scholarship to study in Ph.D program and support for my research in Scotland. I am also grateful to the Graduate School, and Faculty of Science, Chiang Mai University for partial support for my the field research. I am also grateful to Mahasarakham University and the Faculty of Science, Chiang Mai University for partial support to present my work at the AABE22 conference in Japan.

I am indebted to Prof. Dr. Peter J.B. Slater for his useful advice and for taking care of me during my research on vocal communication at the University of St Andrews, Scotland. I am also indebted to J. F. Maxwell for his excellence in plant identification and for his arduous work in commenting on and proofing the dissertation. I would like to thank to Assist. Prof. Dr. Nantaya Aggimarangsee for her advice and guidance.

I am grateful to Mr. Prateep Rojanadilok, the head of Chiang Dao Wildlife Research Station and Mr. Voravut Sono, the head of Khao Pra-Bang Khram Wildlife

Sanctuary for permission to work there and the officers there for their kind help in my field research. I am specially grateful to Mr. Pichet Boonrath, assistant researcher of Klaung Sang Wildlife Research Station, for his expert help in collecting data at Trang. Without his help this research would have been more difficult. I especially thank Mr. Pud Jaku and Mr. Anon Sunjita for their helped in collecting data at Chiang Dao. I am also grateful to Mr. Kriangsak Sribuarod, head of Klaung Sang Wildlife Research Station, for his useful comments.

I sincere thank to Mr. Somboon Kamtaeja, Miss Nootjaree Singkarach and Mr. Komkrich Kaewpanus, members of the Ornithology Laboratory, Chiang Mai University for their help to analyse data and give useful comments. Many thanks are offered to the Bryophyte section, CMU Herbarium, Chiang Mai University for identifying mosses and liverworts for me.

Finally, I give special thanks with great love and appreciation to my parents and my brother who gave a lot of support and encouragement to me from the beginning of the study. My best friends have encouraged and forced me to fight during difficult times.
