ACKNOWLEDGEMENTS

The author wishes to express her sincere thanks and profound appreciation to her thesis supervisor, Dr. Sukjit Kungwankunakorn, for her kind supervision, guidance and continual encouragement throughout this research work and offering many helpful suggestions.

The author is grateful to Miss Thanaporn Na-Chiang Mai of the Department of Chemistry of Chiang Mai University for her technical suggestion on AAS and admirable throughout this work.

The author would like to acknowledge the Center for Innovation of Chemistry (PERCH-CIC) for financial support and the Department of Chemistry, Faculty of Science, Chiang Mai University for providing all laboratory facilities.

Finally, the author wishes to devote her deepest gratitude to her beloved family for their unending love, immeasurable care and endless understanding.
