ACKNOWLEDGEMENT

I would like to express my deep appreciation and gratitude to all those who gave me the possibility to complete this thesis. A sincere appreciation is also extending to all staff of the Department of Pharmacology, Faculty of Medicine, Chiang Mai University for their instructions and their support throughout my graduate study.

I am deeply indebted to Assoc. Prof. Dr. Supanimit Teekachunhatean, chairperson of the supervisory committee and Assoc. Prof. Dr. Chaichan Sangdee, member of the supervisory committee for their excellent guidance and advice on the research plan, comment, thesis writing and encouragement throughout the period of this study.

I would like to extend my special gratefulness to Assoc. Prof. Maleeya Manorot, and Assoc. Prof. Nopamas Rojanasathien, member of the supervisory committee for their encouragement and kind support.

My special thank is also extended to Mr. Boonyium Kumsorn for his friendship as well as valuable guidance on the measurement of isoflavone concentrations, Mr.

Kongkaew Pichakan and Miss Rapheephorn Khatsri for their kind assistance in blood sample collection.

Finally, I would like to express my sincere thank to my family for their love, support and encouragement during my education.

Paveena Pongnad
