ACKNOWLEDGEMENTS

I wish to show my most sincere gratitude to the following people and institutions for their support in helping me to complete this thesis, and to those who helped me during my studies, as this opportunity has been one of the greatest blessings of my life.

First of all, I would like to thank RCSD at the Faculty of Social Sciences, Chiang Mai University for allowing me to pursue my graduate studies. I would like to express my special thanks and appreciation to Dr. Anan Ganjanapan, my thesis advisor and chairman of my thesis examining committee - for his guidance, support, encouragement and understanding throughout the duration of my studies, in particular during the process of revising this thesis. I would also like to acknowledge the support of my thesis proposal committee members: Dr. Jamaree Chiengthong and Dr. Wattana Sugunnasil, who gave me valuable comments and suggestions during the preparation of my proposal, during my field work and whilst writing this thesis.

I would like to express my appreciation to all the RCSD lecturers: Dr. Chayan Vaddhanaphuti, Dr. Chusak Wittayapak, Dr. Santita Ganjanapan, Dr. Yos Santasombat, Dr. Pinkaew Laungaramsri and Ajarn Phrek Gypmantasiri, for their interesting and helpful lectures - they were all excellent at teaching, at holding discussions and at explaining the topics and concepts that I was previously totally unfamiliar with. My sincere thanks also go to all the committee members, as well as the staff at RCSD for their help and kindness during my long study period, especially to Pong, who helped me register my credits and extended my student status when I was not in Chiang Mai.

I would also like to acknowledge the financial support that came from the Heinrich Boell Foundation and thank them for extending my scholarship, as without their support I would not have been able to complete my studies or finish this thesis. I give my special thanks to Dr. Heike Loschmann, Olga Duchniewska, Mr. Jost

Pachaly, Rainer Einzenberger and all the other staff - I greatly appreciate their encouragement and assistance during my study period.

This work would not have been possible without critical support from my family and friends, and I must also thank the people who helped me during my field research, especially those from FREDA and the Pa-O Youth Organization, as well as my classmates for their friendship and help. Among many of them, I would especially like to thank Ko A Moe for his patience and for providing me with information on forest management in Myanmar; for sharing his personal experience at implementing community forests in the remote areas of the country, and also for accompanying me during my trip to the research village to carry out data collection.

I must also give thanks and love to my beloved grandmother, father and mother, plus to all my brothers and my sister, all of whom supported me and shared my family responsibilities, and also my wife - Aye Myint Than - for standing by me and encouraging me throughout my studies. I dedicate this work to all of them.

Finally, I owe a huge debt to the Pa-O community in Kalaw Township, who accepted my presence in their village and answered my persistent questions with patience. Their hospitality, kindness and tolerance helped me gain the valuable information I needed to complete this research; to them, I would like to express my sincere gratitude and thanks.

Kyaw Kyaw Tun
