ACKNOWLEDGEMENTS

I would like to express my profound gratitude to my supervisor, Assistant Professor Dr. Teraboon Pojanagaroon my advisor for his supervision, guidance, continual encouragement and assistance. I would like to thanks Associate Professor Dr. Saisunee Liawruangrath and Dr. Sakchai Satienperakul my co-advisors for their helpful, review, recommendations, invaluable guidance, comments, suggestions and constant encouragement from the beginning to the end of this thesis work.

I would like to thanks Dr. Tanin Tangkuaram for his valuable comments, and guidance. I also would like to thank all members in Alpha Flow Research Group for their guidance for solving flow analysis problems.

I wish to express my thanks to “Center for Innovation in Chemistry: Postgraduate Education and Research Program in Chemistry Higher Education Development Project, Ministry of Education (PERCH-CIC)” for the partial support. I also thank the Graduate School of Chiang Mai University and the Faculty of Science, Chiang Mai University for their partial funding for presenting part of my work in Pure and Applied Chemistry International Conferences (PACCON 2011).

I would like to express my deepest gratitude to my parents and grandmother for their tender love, continuous care and encouragement.

Finally, I would like to thank those whose names are not listed here, who have one way or another contributed to the success of this work.
