ACKNOWLEDGEMENTS

Lect. Dr. Sasinunt Supakitjamnong is my extremely wonderful advisor who has advised me until this particular independent study was completed. Her care, kindness, and encouragement have supported me in doing this research continually, even though I had difficult times during this task.

I am grateful to Assoc. Prof. Dr. Priya Nokaeo for her useful recommendations and her knowledge passed on to me in the proposal writing class. I would like to thank Achan Torpong Wannawati for his suggestions and inspiration.

To my colleagues at Samakkhiwitthayaknom School, Chiang Rai, I would like to thank Henry Phillips and Paul Lewis for editing aspects of my language and encouraging me during the research study. I would also like to thank Narasak Chairueang and Suparang Boonying for advising me on the statistics information.

My special thanks go to Mathayom Suksa 4 Samakkhiwitthayaknom students for their heart, head and hand in participating in this research. They were the reason I could smile when I was disheartened along the way doing this research.

Last but not the least; I devote this research to my father, mother, brother and Songphon Aophithak for their unconditional love and understanding.
