## ACKNOWLEDGEMENTS

Contribution and support from many people helped me completion of this thesis. I would like to take this opportunity to express my appreciation to them.

First, I would like to express my deepest thank to my supervisor, Prof. Dr. Suthep Suantai, for his initial idea, guidance and encouragement which enable me to carry out my study successfully.

This work contains a number of improvement based on comments and suggestions provided by Prof. Dr. Suthep Suantai, Prof. Dr. Sompong Dhompongsa, Prof. Dr. Somyot Plubtieng and Asst. Prof. Dr. Bancha Panyanak. It is my pleasure to express my sincere thanks to them for their generous assistance.

I wish to thank Prof. Dr. Anthony To-Ming Lau and his family for their taking care, guidance and support while I was at University of Alberta, Canada.

I also wish to thank Prof. Dr. Yeol Je Cho and his family for their hospitality, helpfulness and support while I was at Gyeongsang National University, South Korea.

Thanks are also extended to my wife, Mrs. Watcharaporn Cholamjiak and my parents for their love and encouragement during my study.

Moreover, I would like to thank for all lectures for their previous valuable instructions while studying.

Finally, I greatly appreciate the Royal Golden Jubilee Grant PHD/0261/2551, the Thailand Research Fund and University of Phayao, Thailand for financial support during my Ph.D. study.

Prasit Cholamjiak
