Abstract in	n Thai	iv
Abstract in	n English	v
Chapter 1	Introduction	1
Chapter 2	Basic Concepts and Preliminaries	4 4
	2.2 Banach Spaces and Hilbert spaces	9
	2.3 The Background of Fixed Point Theory	13
	2.4 Fixed Point Theory of Nonexpansive Mappings and	
	κ -Strictly Pseudo-contractive Mappings	20
	2.5 Equilibrium Problems and Generalized Mixed Equilibrium	
	Problems in Hilbert Spaces	21
	2.6 Some Useful Lemmas	23
Chapter 3	Common Fixed Points of Asymptotically Quasi-nonexpansive	
	Mappings	26
	3.1 A New Approximation Method for Common Fixed Points	
	of a Finite Family of Asymptotically Quasi-nonexpansive	
	Mappings in Banach Spaces	26
	3.2 Strong Convergence Theorems for a Finite Family of	
	Asymptotically Quasi-nonexpansive Mappings in Banach	
	Spaces	28
	3.3 Weak and Strong Convergence Theorems for a Finite Family	
	of Asymptotically Quasi-nonexpansive Mappings in Uniformly	7
	Convex Banach Spaces	31

vi

Chapter 4	Equilibrium Problems and Fixed Point Problems of	
	Quasi-nonexpansive Mappings	38
	4.1 A Strong Convergence Theorem of Hybrid Methods for	
	Generalized Mixed Equilibrium Problems and Fixed Point	
	Problems of an Infinite Family of Lipschitzian Quasi-	
	nonexpansive Mappings in Hilbert Spaces	38
	4.2 Deduced Strong Convergence Theorems and Applications of	
	Hybrid Methods in Hilbert Spaces	46
Chapter 5	Conclusion	49
	5.1 Common Fixed Points of Asymptotically Quasi-nonexpansive	
	Mappings	49
	5.1.1 Strong Convergence Theorems for a Finite Family of	
	Asymptotically Quasi-nonexpansive Mappings in Banach	1
	Spaces	49
	5.1.2 Weak and Strong Convergence Theorems for a Finite	
	Family of Asymptotically Quasi-nonexpansive Mappings	1
	in Uniformly Convex Banach Spaces	49
	5.2 Equilibrium Problems and Fixed Point Problems of	
	Quasi-nonexpansive Mappings	50
	5.2.1 A Strong Convergence Theorem of Hybrid Methods for	
	Generalized Mixed Equilibrium Problems and Fixed	
	Point Problems of an Infinite Family of Lipschitzian	
	Quasi-nonexpansive Mappings in Hilbert Spaces	50
	5.2.2 Deduced Strong Convergence Theorems and Application	S
	of Hybrid Methods in Hilbert Spaces	51
