ACKNOWLEDGEMENTS

All help and support by many people and organizations make me complete this thesis successfully. I would like to mention my appreciation to all of them here.

First, I would like to express my deepest thank to my advisor Professor Dr. Suthep Suantai for his advice and encouragement during my Ph.D. path. He has spent a lot of time in order to give me many useful suggestions about both academic and nonacademic issues. Because of him, I feel very happy during carrying out my research. I also would like to thank my co-advisors Professor Amnuay Kananthai and Assistant Dr. Bancha Panyanak for their academic guidance. Also, my thesis is complete because of comments and suggestions by Professor Dr. Somyot Plubtieng and Assistant Professor Dr. Narin Petrot. It is my pleasure to express my sincere thanks to them for their generous assistance.

I greatly appreciate the Office of the Higher Education Commission, the Thailand Research Fund and the Graduate School of Chiang Mai University for financial support.

Very special thanks go to my beloved father and mother who always support and encourage me in many ways. Finally, I have great pleasure in expressing my sincere gratitude to my wife and my daughter for their encouragement and understanding.

Atchart Kettapun
