## ACKNOWLEDGEMENT

The success of this thesis is attributable to a great support and assistance from my advisor, Associate Professor Prasit Tharavichitkul and my co-advisor; Dr. Anusorn Boonthum and Dr. Kwanjit Duangsonk. They gave me a good opportunity and valuable experience, precious guidance, point of view, support, encouragement, and inspiration that made me strengthened and had a good attitude on my work.

My sincere gratitude is also given to the examining committee, Associate Professor Dr. Varaporn Vuddhakul for the valuable points of suggestion and comments to make my thesis manuscript in a better shape.

Great appreciations are given to Ms. Piyawan Takarn and Ms. Ariya Sapmak for their good advices for solving problems and teaching me molecular techniques. Thank you for love, good wishes, and encouragement during this thesis project.

I am especially grateful to Mrs. Manasnant Bunchoo, Ms. Vilai Baosoung, Mr. Banyong Khantawa and all staff members, Division of central laboratory, Maharaj Nakhorn Chiang Mai hospital and Achara Fongcom, MD Ph.D. and Mr. Piyapong Pinta, Division of Bacteria laboratory, Lamphun Provincial hospital for helping and supporting the hemoculture samples. I would like to thank Mr. Anusak Kerdsin, Department of Medical Sciences, Ministry of Public Health and all staff members of Doi Saket Hospital Laboratory and Sanpatong Hospital Laboratory.

In addition, I am appreciative to Associate Professor Pannipa Siripermpool for giving a good wishes and encouragement during this study.

Many thanks go to my friends, especially in the Department of Microbiology for their encouragements and good friendships and I would like to thank all staff members for helping and facilitating in everything.

I would like to express my particular acknowledgement to Faculty of Medicine, Chiang Mai University for supporting my thesis research under the Endowment Fund for Medical research.

Most importantly, I am grateful to warm family and everything you fulfilled my life perfectly.

Wannisa Raksamat
