ACKNOWLEDGEMENT

I wish to express my deep and sincere gratitude to my co-advisor, Assoc. Prof. Dr. Ampai Panthong, the Center for Innovation in Chemistry (PERCH-CIC) and the Department of Pharmacology, Faculty of Medicine, Chiang Mai University, for her excellent instruction, guidance, encouragement, valuable suggestion as well as for her strong support of my studies.

I would also like to show my full gratitude to my thesis advisor, Dr. Natthakarn Chiranthanut, the Department of Pharmacology, Faculty of Medicine, Chiang Mai University, for her kindness, expert guidance, valuable suggestions, constructive criticism and constant encouragement, which enabled me to complete my research.

I would like to express my sincere appreciation to my thesis co-advisors, Dr. Parirat Khonsung and Dr. Puongtip Kunanusorn for their valuable and kind suggestion, instruction and assistance in laboratory technique during carrying out my research work.

A special gratefulness is also extended to Assoc. Prof. Dr. Chaichan Sangdee for English proof-reading in this thesis.

I would like to express my sincere thanks to PERCH-CIC for providing scholarship and financial support for the research work.

I owe special gratitude to Prof. Dr. Vichai Reutrakul, Director of PERCH-CIC for providing the plant extract used in this research.

I would like to thank all staff members of the Department of Pharmacology, Faculty of Medicine, Chiang Mai University, for their kind help and encouragement throughout my research.

I also wish to express my thanks to all my beloved friends for their special support, helpfulness and unforgettable friendship during my educational experience.

Finally, I wish to express my deepest gratitude to my beloved parents and family for their encouragement and moral support throughout my graduate study.
