## ACKNOWLEDGEMENT

I would like to express my deepest gratitude and appreciation to Assoc. Prof. Maleeya Manorot, my thesis advisor for her special support, excellent encouragement, and a valuable guidance on my thesis writing. This thesis could not have been succeeded without her assistance.

Special gratitude to Assoc. Prof. Dr. Chaichan Sangdee for his valuable comments and suggestions on the thesis writing. I wish to express my sincere thank to Assoc. Prof. Dr. Supanimit Teekachunhatean for his suggestions on data analysis, special gratefulness to Assoc. Prof. Supranee Fooanant, Assoc. Prof. Noppamas Rojanasthien, Asst. Prof. Dr. Sukit Roongapinun, member of the co-advisory committee for their encouragement, kind support, and committees, especially Nuttiya Hanprasertpong for her abundant aiding, well-advised and plentiful suggestions during carrying out this research. Special thanks to Asst. Prof. Amparat Romsai for her suggestion on the sampling technique and sample analysis of nasal cytology.

A special gratefulness is also extended to all staff of the Department of Pharmacology, Faculty of Medicine, Chiang Mai University, especially Miss Rapheephorn Khatsri for their kind assistance in differentiation of nasal inflammatory cell types.

Thankfulness to Mrs. Laksana Narksen, staff in the sinus and Allergy Unit, Department of Otolaryngology, Faculty of Medicine, Chiang Mai University for her assistance in conduction of skin prick testing.

Thanks are also provided to all patients enrolled in this research and to the Faculty of Medicine, Chiang Mai University for financial support for this project.

Finally, I am greatly indebted to all members of my family for their constant and cheerful encouragement, understanding and support.
