## ACKNOWLEDGEMENTS

I would like to express my sincere gratitude to all those who provided me with the opportunity to complete this thesis. I would like to thank the Veterinary Public Health Centre for Asia Pacific (VPHCAP), Chiang Mai University and Freie Universität Berlin, Germany, and the MVPH Administration, in particular, Prof. Dr. Reinhard Fries, Dr. Maximilian Baumann and their staff in Germany, Assoc. Prof. Dr. Lertrak Srikitjakarn, Assist. Prof. Dr. Duangporn Pichpol, Dr. Tongkorn Meeyam, Dr. Prapas Patchanee and their staff in Thailand for giving me permission to begin my work on this thesis. I would also like to thank the VPHCAP for providing me great financial support.

I would like to express my sincere gratitude and deep appreciation to my thesis advisory committee: Prof. Dr. Reinhard Fries of the Institute of Meat Hygiene and Technology, Faculty of Veterinary Medicine, Freie Universität Berlin, Germany; Assist. Prof. Dr. Duangporn Pichpol of Faculty of Veterinary Medicine, Chiang Mai University, Chiang Mai, Thailand; and Dr. Tongkorn Meeyam of the Faculty of Veterinary Medicine, Chiang Mai University, Thailand for their encouragement, supervision and guidance throughout this research study. Without their interest and kindness, this thesis would not have been successfully completed.

I wish to thank Dr. Prapas Patchanee and Dr. Kannika Na-Lanpang for looking closely at the statistical analysis in this thesis, for their advice and encouragement when I approached them during the course of research, for correcting and offering suggestions for improvement. Special thanks go to Prof. Dr. Reinhard Fries and his staff at the Institute of Meat Hygiene and Technology, Freie Universität Berlin, Germany for their advice and guidance with the microbiology laboratory work. I am greatly indebted to all the teachers and assistants within this Joint Master Program in Veterinary Public Health

(VUW), Vienna, Austria for their critical comments, knowledge and experience-sharing as well as their friendship and cooperation. I also would like to extend my gratitude to Assist. Prof. Dr. Peter Paulsen and his staff at Institute of Meat Hygiene, Meat Technology and Food Science VUW, Vienna, Austria, for their guidance in introducing me to advanced laboratory techniques in food microbiology.

Many thanks are also given to all laboratory staffs and technicians of the Central Laboratory, Faculty of Veterinary Medicine, Chiang Mai University for providing a great atmosphere and excellent laboratory equipment as well as all the chemicals and equipment used in this research and to my colleagues in VPHCAP, Mr. Anuwat Wiratsudakul and Ms. Chomporn Chokboonmongkol, for their support and kindness during my study.

It was a great experience for me to have had a wonderful stay in Berlin. Therefore, I would like to thank Dr. Norbert Miethe, Mrs. Louise Le Bel, Ms. Antje Hoppenheit, my Thai friends in Berlin, especially Dr. Kwanchai Kreausukon and his wife, Dr. Tongkorn Meeyam, Dr. Kriangkrai Thongkorn, Dr. Areerat Akavipat for their help and support to me during my stay in Germany.

I am also grateful to all my friends in the fourth group of the MPVH program for their support, encouragement, and for always being beside me during my thesis work. We spent a long time together during this study period. I hope our friendship will last forever. I would like to thank all those whose direct and indirect support has helped me to complete my thesis.

Papaspong Jongchansito
