ACKNOWLEDGEMENTS

First and foremost I would like to express my great respect to our Lord Buddha for delighting me to become a Ph.D from Chiang Mai University.

I would like to reveal my deep appreciation and hearty thank to my supervisor Professor Dr. Saisamorn Lumyong, who is the most responsible for helping me to complete the study as well as the challenging research that lies behind it. I am highly indebted for accepting me as her advisee, crucial support, encouragement and guidance throughout my study in Chiang Mai University.

A special thank goes to my co-advisors, Assistant Professor Dr. Panuwan Chantawannakul and Dr. Wasu Pathom-aree for their valuable supervision, suggestion and comments.

I am especially indebted to Assistant Professor Dr. Chartchai Khanongnuch my graduate committee, Professor Dr. Jariya Visitpanich for their kind attention, suggestion and guidance.

My great appreciation was lead to Arjarn Amphan (Former Assistant Professor Dr. Ampan Bhromsiri) whose kind information, suggestion, encouragement and especially arranging a place worked for the collection and handling of fruit fly.

My cordial gratitude goes to Organization for Women in Science for the Developing World (OWSD), Italy (formally TWOWS) and Sida (Swedish International Development Cooperation Agency) for postgraduate scholarship; the Higher Education Commission, Thailand under National Research University

program for supporting the materials, and grants from the Graduate School of Chiang Mai University, Chiang Mai, Thailand.

I would like to acknowledge my former Prof. Dr. Myint Thuang, Dr. Aung Kyi and all thankful teachers at Yezin Agriculture University, Myanmar. I never forget their guideline, kind and encourage most forever.

Let me also say deepest thanks to Pingpong (Mr. Nakin Suwannarach), N'Yai (Mr. Jaturong Kumla) and all of my colleagues who I met in our laboratory (2813) for their friendship, kindly help and sharing knowledge. And I would like to say thanks to Ms. Prat from Microbial Biotechnology Research Unit for helping in cytotoxicity test.

More specifically, I will never forget to thank my beloved SOE who support my requirements and encourage me through out our times. I would like to thank all the people who have directly or indirectly helped me in completing this thesis.

Last, but not least, my deepest and forever thanks to my parent, U Maung Thein and Daw Kyi Win, who encourage and support me in many ways through out my life. My sincere thanks go to my brothers, Ko Tha and A Nge Lay, who always patient on me every things. It is to commemorate their love that I dedicate this thesis to them.
