## ACKNOWLEDGEMENTS

I wish to express my sincere gratitude and deep appreciation to Associate Professor Dr. Pornngarm Dejkriengkraikul, my advisor in Chiang Mai University, for her special efforts, patient guidance, precious advices and persistent encouragements from the initial to the final level enabled me to develop an understanding of the subject.

I wish to express my deepest gratitude and appreciation to Professor Dr. Yasuhiro Yamada, and Professor Dr. Hideyuki Mori in Gifu University for their valuable supervisions, assistances, excellent encouragements and discussions during my visit in the Department of Tumor Pathology, Gifu University Graduate School of Medicine, Gifu, Japan. This thesis would not have been a complete success without their professional guidance.

I would like to thank Kyoko Takahashi and Ayako Suga for their technical assistance in tissue sections. I wish to thank to Dr. Akihiko Hirata and Yoshitaka Kinjo (Division of Animal Experiment, Life Science Research Center, Gifu University) for their help about animal care and *in vivo* techniques.

My sincerest thanks particularly go to all the staff members in the Department of Tumor Pathology, Gifu University Graduate School of Medicine, for their assistance, kindness and friendship during my visiting.

I am deeply indebted to Assistant Professor Dr. Chaiyawat Chaiyasut, my thesis co-advisor, and staffs in his laboratory at Faculty of Pharmacy for giving me the favor to explore the content of  $\gamma$ -tocotrienol in Thai rice.

I also would like to express my gracious thank to Dr. Supachai Yodkeeree, my thesis co-advisor for their special efforts, unforgettable support, and encouragement.

I would like to thank to Associate Professor Dr. Prachya Kongtawelert and Associate Professor Dr. Siriwan Ong-chai for their technical support about the Molecular Imager ChemiDoc XRS System (Bio-Rad).

I owe my deepest gratitude to all staff members and colleagues in the Department of Biochemistry, Faculty of Medicine, Chiang Mai University for their assistance, kindness and friendship. I also would like to thanks all members in Dr. Pornngarm's laboratory for their kind assistance and friendship.

I would like to gratefully acknowledge the Royal Golden Jubilee Ph.D. Program of Thailand, the National Research Council of Thailand (NRCT), a Grant-in-Aid from Ministry of Education, Culture, Sports, Science and Technology and Grant-in-Aid from Ministry of Health, Labour and Welfare of Japan for their grants support.

I would like to express my deepest appreciation to my family, all of whom were especially supportive and extremely helpful, for their love, understanding, emotional assistance, and encouragement.

Lastly, I offer my regards and blessings to all of those who supported me in any respect during the completion of my thesis.

Suphot Phutthaphadoong
